

I-680 Contra Costa Express Lanes

Clean Air Vehicle Tolling Begins October 2, 2020

Clean Air Vehicle Tolling

Starting October 2, eligible clean air vehicles (CAVs) (those with a valid DMV decal) can use the I-680 Contra Costa express lanes for half-price tolls. Eligible CAVs **MUST** apply for a new [FasTrak CAV toll tag](#) to get the CAV toll discount. The increasing numbers of CAVs in the Bay Area are placing high demand on HOV and express lanes. CAV half-price tolls will improve travel times in the express lanes.

Double White Line Restricted Access

Drivers on southbound I-680 Contra Costa are also getting used to new lane restrictions that went into effect August 24th. Access into and out of the far-left lane (lane 1) and the adjacent general-purpose lane (lane 2) is restricted southbound from SR-242 to Treat Blvd. and from Rudgear Rd. to Stone Valley Blvd. Solid, double white lines improve lane performance and lane safety by prohibiting cars from moving into or out of the far-left lane in congested areas.
