# Introduction

The Metropolitan Transportation Commission (MTC) is proud to present this year's edition of one of its most requested documents, the *Statistical Summary of Bay Area Transit Operators*, which includes a summary of financial and operating information for the majority of public transit agencies in the nine-county San Francisco Bay Area.

This report is formatted to allow for quick and easy access to profiles of the 25 public transit agencies. We hope our target audience — which includes transit operators, agencies, consultants, academic and industry researchers, elected officials and the general public — will get a clear sense of regional trends over the past 5 years.

# Format

### **Operator Profile**

To effectively communicate the financial and operating data of the individual transit operators, this edition of the Statistical Summary continues to include graphs that highlight operating costs, total passengers, cost efficiency and cost effectiveness in addition to two graphs introduced last year: farebox recovery and service effectiveness. Also in this year's edition, the Statistical Summary includes regional trend graphs focusing on operating costs, total passengers, cost efficiency and cost effectiveness during the five-year period in addition to a transit operator comparison graph focusing on farebox recovery and service effectiveness.

### **Financial and Operating Data**

The tables following each operator profile contain current (as of July 2016) operator specific financial and operating data for fiscal years 2011-12 through 2015-16 for each transit mode provided by the agency.\*

Data for this publication is taken from transit operators' annual Transportation Development Act claim for funds, the Federal Transit Administration National Transit Database reports, State Controllers' reports and data provided to MTC through correspondence with the transit agencies.

Data for fiscal years 2011-12 through 2014-15 have been audited. This edition of the *Statistical Summary of Bay Area Transit Operators* continues to include estimated figures for the most current fiscal year (2015-16). The inclusion of fiscal year 2015-16 data is an effort to provide readers with up-to-date information. Please note that fiscal year 2015–16 data are only estimates and are subject to change.

For definitions of terms that are commonly used in the text of this document, please refer to the "Definitions" section that begins on page 135.

\* In some cases, columns may not sum to total due to rounding.

# Performance Measures

Performance measures are used by transit agencies for monitoring progress toward policy goals and objectives. With the five-year data presented in this report, performance measures can be used to identify trends over time, as well as to forecast future performance. The following table lists performance concepts, the performance measures used to illuminate each concept and the formula for calculating each measure (in terms of the variables used in this document). Cost effectiveness calculations are presented both in current dollars and in constant fiscal year 2011-12 dollars, using a Bay Area-specific Consumer Price Index (CPI) to account for inflation.

| Performance Concept   | Performance Measure                             | Formula   |
|-----------------------|---|-----------|
| Cost Efficiency       | Operating cost per revenue-vehicle hour         | cost/hr   |
| Cost Effectiveness    | Operating cost per passenger                    | cost/pass |
| Service Effectiveness | Passengers per revenue-vehicle hour             | pass/hr   |
| Service Effectiveness | Passengers per revenue-vehicle mile             | pass/mi   |
| Labor Efficiency      | Revenue-vehicle hours per employee equivalent   | hr/emp    |
| Farebox Recovery      | Ratio of fares received to total operating cost | fare/cost |

# Graphs

To effectively communicate the financial and operating data of the individual transit operators, this edition of the *Statistical Summary* continues to include graphs that highlight operating costs, total passengers, cost efficiency, cost effectiveness, farebox recovery, and service effectiveness. The *Statistical Summary* also includes regional trend graphs focusing on operating costs, total passengers, cost efficiency and cost effectiveness during the five-year period in addition to a transit operator comparison graph focusing on farebox recovery and service effectiveness in the region.

Different scales are used in the graphs because transit operations differ by mode, operating environment, system size and other factors. Readers should be aware of the varying scales when comparing graphs between both operators and modes.

[3] AC Transit, in partnership with BART, initiated paratransit service in FY 1996-97 through the creation of the East Bay Paratransit Consortium (EBPC). AC Transit contributes approximately 69% of EBPC's funding, with BART contributing the remainder. All paratransit numbers shown (operating costs, farebox, total passengers, revenue vehicle miles, and revenue vehicle hours) represent AC Transit's share (69%) of EBPC operations.

[3] In partnership with AC Transit, BART provides paratransit in western Alameda and Contra Costa counties and in part of San Francisco through the East Bay Paratransit Consortium (EBPC). BART contributes 31% of the funding for EBPC. Operating data and performance concepts reflect 31% of the EBPC operations.
[4] BART also provides funding to SFMTA, CCCTA, Tri-Delta, and LAVTA for paratransit outside the EBPC area. Operating and performance data for those services are listed by those operators.

[5] Automated Guideway Performance reflects the Oakland Airport Connecter (OAC). Opened in 2014, reported for first year in FY 14-15.

San Francisco Bay Ferry provides a regional transit link between the cities of Alameda, Oakland, San Francisco, South San Francisco, and Vallejo. Seasonal service is also provided to Angel Island and AT&T Park.

\*Majority of Riders are from Oakland, Alameda, and Vallejo. Also includes parts of Napa, Sonoma and SF Counties. Given the nature of ferry transit service and the difficulty of defining a service area based on ferry routes that do not traverse through census tracts, it was determined that the preferred way to define the service area for WETA was to utilize passenger survey responses to identify home/origin census tracts. WETA redefines its service area based on the results of the onboard survey conducted every 3-4 Years.

[3] Beginning in FY 2011-12, SolTrans officially took over and consolidated the public transit systems of Vallejo and Benicia. Prior to FY 2011-12, Vallejo and Benicia's transit systems were operated independently. The MTC staff has combined historic Vallejo and Benicia transit systems' operating data for illustrative purposes.

[4] Includes paratransit deviated fixed-route van, general dial-a-ride, and local taxi program. Intercity taxi scrip numbers are reported by Vacaville.

# **Definitions**

**Fiscal Year (FY)** Reporting period for data (e.g., FY 2015-16 runs from July 1, 2015 to June 30, 2016).

**Operating Costs (by Mode)** Total expenses from operations, vehicle maintenance, non-vehicle maintenance, general administration, adjustments, direct costs for providing charter services, and all vehicle lease costs. Excludes depreciation and amortization expenses.

**Per Capita Ridership** Total passengers for all Fixed-Routes divided by total population in service area (Fixed-Route includes all modes with the exception of paratransit).

# **Operating Data**

**Total Passengers** Total of all adult, youth and student, senior and disabled, inter-operator paid transfer, and non-revenue boarding.

Average Weekday Ridership Reflects the National Transit Database definition of Average Weekday Unlinked passenger trips defined as the number of passengers who board public transportation vehicles on an average weekday during a month.

**Revenue Vehicle Miles** (Also referred to as "Vehicle Service Miles") The total number of miles that each transit vehicle is in revenue service. The measure excludes miles traveled to and from storage facility, and other deadhead travel.

**Revenue Vehicle Hours** (Also referred to as "Vehicle Service Hours") The total number of hours that each transit vehicle is in revenue service, including layover time. The measure excludes hours consumed while traveling to and from storage facility, and during other deadhead travel.

**Employee Equivalents** One full-time employee (FTE) equivalent equals 2,000 hours per year.

**Farebox Recovery Ratio** A basic formula of fare revenues divided by the total operating cost. MTC's formula does not reflect the legal ratio required by the Transportation Development Act.

# **Operating Revenue**

**Farebox (by mode)** Revenue from passenger fares (single fare and passes), including revenue earned directly, special transit fares (which may include funds paid as route guarantees by organizations rather than riders), and revenue derived from revenue-sharing agreements with other services and/or operators.

Non-Fare Revenue\* Income derived from operations associated with transit. This includes advertising, parking fees, concessions, feeder bus funds, reimbursements for operations, charter services, and funds for student transportation. All sources not fitting this definition are categorized in "other". Interest can be reported in "Non-Fare Revenue" or "Other".

**Property Tax** Operating revenue from property tax directly levied by the transit agency.

**County Sales Tax** Operating revenue from sales taxes levied by the transit agency or by other agencies.

**TDA (Transportation Development Act)** Operating revenue generated by a one-quarter of one percent sales tax on all retail sales in each county; used for transit, special transit for disabled persons, and pedestrian and bicycle purposes.

**STA (State Transportation Assistance)** Operating revenue generated by state funding program for mass transit operations and capital projects.

**Federal Transit Grants** Operating revenue from Job Access and Reverse Commute Grant, FTA Section 5307 Grants, Section 5311 Grants and Section 5303 Planning Grants.

**Other\*** City or county general funds, subsidy from other sectors of operation, 5% Unrestricted State Fund Reserves, feeder bus funds, AB 1107 Permanent 1/2 cent sales tax, RM2 (Regional Measure 2 - bridge tolls), TFCA (Transportation Fund for Clean Air), and other sources not fitting the "non-fare revenue" definition. Interest can be reported in "Non-Fare Revenue" or "Other".

\*Charter service and feeder bus funds have been appropriately re-classified from "other" to "non-fare revenue".
