You know, I'm also in support of all the changes proposed. I just wanted to mention that expanding the income considerations is going to be huge here. You know, thinking about it not just at the federal poverty level but up to something like 400 percent of the federal poverty level could be a good threshold to think about for the low-income toll discount. I also wanted to mention that enforcement continues to be an issue in these express lanes and I'd like to see if staff could provide a status update on the state of enforcement pilots that are currently in progress such as those occupancy camera pilots or the apps that allow drivers to self-declare their occupancy. That is, it's unclear today where all those pilots stand. Thank you.</p>

1330	5/25/2022	N/A (public hearing)	N/A (public hearing)	N/A (public hearing)	N/A (public hearing)	N/A (public hearing)	N/A (public hearing)	I'm in support; I think there's a lot of good work here. I believe in the premise of user fees for paying for roads. And roads have to be paid for because I know what it's like to drive on bad roads. And so we want to keep these roads up. I feel that it is important for our executive director to have authority to make emergency changes because things move fast and it takes a while to get a whole panel of people together. And I've known Therese for quite a while and I think she would do a very good job of making such decisions. And I think we have to have flexibility and be nimble. And I support the idea of a means-based toll pilot. It's really no different than having a reduced fare Clipper card. I do it all the time. So, I think this is worthy of passage and I look forward to seeing what our June proposal looks like.
1329	5/24/2022	10	Fastrak lanes needs to be fixed; It's useless on 880 during peak traffic. It forces poor people to sit in traffic. Constant fraudulent violations. Zero accountability. Predatory replenishment system. Website designed to be confusing, difficult, and time consuming. No consumer/public protections.	10	Fastrak is a poorly a designed/ implemented system. Too many ways to incur fees and violations without due process or civilian oversight	5	Need to be for more than just emergencies. Reducing tolls and penalties need to be an ongoing thing	Fastrak has mainly 1 star reviews on BBB, Yelp, Google, Facebook. Nothing is being done to fix any grievances/issues with the system that is still in the process of being fully implement. No business should be able to survive with such a negative consumer response but we are being forced to because of a government contract with a for profit private company. BART or VTA could take over the system and it would work better
1328	5/23/2022	7	Should be combined with projects to reduce the need for driving and supporting alternative modes.	8	Criteria for changes should be clear and available in advance of decision.	5	This should have checks and balances: e.g. limited number of days it can apply.	None

1327	5/19/2022	0		8		5	This question is so twisted I'm not sure what a yes or no would even mean... And if it means what I think (suspending or reducing tolls for everyone in response to an emergency) how would that info even get out to the public?	It's actually good to get these sorts of questions out to the public

1322	5/18/2022	0	Express lanes cannot be clogged by drivers moving at a rate slower than traffic. You need to focus on rules of the road. Slower traffic moves to the right. Like the German autobahn.	10	Slow drivers create artificial traffic jams. Especially early morning. Let drivers get around them free of charge.	10	If there is an emergency, let the people go	Slow drivers in the left lanes create jams and are a major source of traffic jams. Enforce slower drivers moving over to the right lanes. They are more dangerous than the drivers weaving through traffic. Educate and enforce German autobahn rules. This way slow drivers know to move over to the rest of traffic that is flowing faster to them providing a clear lane, instead of having to navigate around the right lanes to pass.
1321	5/18/2022	2	Does that mean that the amount for other drivers will increase to balance the cost?	2	That will give them the right to Do as they please without being governed.	1	That doesn't even make sense. How would you know if there is an emergency?

1318	5/18/2022	2		2	I would not want to see fines for toll violations relaxed by a resolution from some board of appointees.	5		The express lanes are only useful if they are not clogged with cars. Sometimes I look at the posted cost for the express lane and decide not to use it. Lowering the cost, even though based on income which seems fair, could add more cars to the express lane. Too many cars and the express lane is not useful. There should be NO flexibility with toll violations. If you want to use the express lane you should expect to pay the toll and failing that, pay the fine.
1317	5/18/2022	0	non-sense, this paid route shouldn't even exist. everyone paid tax, should be treated and use the public route fairly. this is a proven that newsom is impotent including the worst education system among the states.	0	stupid idea and caused so many annoyed issue to the tax payers.	0

1314	5/18/2022	10	Concerns that it doesn't expand to the bridges- low income folks can't afford gas, express lanes and bridge(s) in a day. Express lanes have become the new "carpool" lanes for the wealthy. Tax dollars are spent on lanes for those that can afford it- that's unfortunate!	10	Penalties should be income based to keep it equitable. Rich folks consider tickets and violations as a nominal fee they can pay to get somewhere faster, and doesn't impact them the same way it impacts someone with a lower income.	10	Who defines emergencies and how can we avoid people abusing the system?	Make the lanes and violated all income based/ that's the most fair system for all.
1313	5/18/2022	0	This defeats the purpose of adding a toll to create an express lane. Lowering the toll price will increase traffic in the express lane thus defeating the purpose of an express lane.	5	NA	10	NA	NA

1310	5/18/2022	10	Express lanes create traffic and apply a regressive tax on lower income brackets. There should never be a "pay to drive faster" feature on freeways. Either everyone pays a toll, or nobody pays a toll, giving higher income drivers an almost exclusive lane is incredibly ass backwards.	10	Express lane violations should be lower and we should be allowed to overtake using express lanes if traffic permits	10	Just give us back our old HOV lanes, or get rid of these stupid things altogether and just have a nice big wide freeway	HOV and express lanes are dumb and cause traffic. California should invest more in driver education and training and less into squeezing out every cent from drivers

1307	5/18/2022	0	I think it is economic warfare on the middle class. If you are rich, you can afford to buy whatever type of car and drive in that lane. If you are poor, you can get in that lane for cheap. Middle class? Why not punish us? We provide the tax dollars that support the actual roads and yet get no rewards for this BS. Carpool and toll lanes are classist, elitist, and discriminatory.	5	I think the whole idea that you have to pay or be able to put someone in your car to use a lane of a public road is counter productive.	5	So like the economic recession? Or the pandemic? Why would we even have toll roads right now?	
1306	5/18/2022	2		7		8		
1305	5/18/2022							The express lanes seem mostly empty. Have you determined that if you eliminated the toll that would alleviate the traffic somewhat? Or is it that you are more interested in collecting money than alleviating traffic?

1282	5/17/2022	10	The income disparity in the vat area is outrageous, so anything that helps low income individuals is good in my book. Also, if this somehow encourages people to register their vehicle and have car insurance, even better.	5	I'd like to know more about the potential impacts of this change, for now I have no strong feelings	10	This sounds very necessary	
1281	5/17/2022	4	Concerns: What determines the low-income threshold. How will toll lanes confirm low-income status. The honor system for toll lanes is likely broken enough already.	4		6

1279	5/17/2022	10		10		0		I hate MTC express lanes. They've made driving more congested and dangerous. People weave in and out of the lanes to evade paying. I hate whoever plagued our freeways with this garbage. We already pay taxes but have to pay more? I HATE YOU ALL.
1278	5/17/2022	10	I feel the poor still won't use express lanes even with discounts. I'm of moderate income and I don't use the lanes. I only see it benefiting high income drivers. Seeing this only benefiting a small pool of drivers. In stead of thinking of different ways to make \$ money. Bringing back free for car pools of 3 or more. Would benefit a lot more drivers . By freeing up more lanes evenly.	5	N/A	5	N/A	N/A
1277	5/17/2022	4	How do you prove income? How it is enforced? "Low income" in the Bay Area is anyone making less than \$140k, which is a fortune in other areas	6	State the toll, violators should know what the risk is	7

1276	5/17/2022	8	I do want the primary priority for these lanes to be a driver for zero or very low emission cars given the major concerns of climate change. But discounts for low income folks does make sense.	2	I do ultimately think it should be up to the governing body to set tolls, we don't want people using these lanes if they aren't paying / allowed.	8	I think it ultimately depends on what emergency means in this case. But it should be up to the governing body to manage these decisions.	
1275	5/17/2022	10		1	People need to follow the rules. The penalty should not be an exception to anyone. You break the rules, you pay the penalty.	10	Emergency situations should always be an exception.	There needs to be clearer understanding of what is being charged using the express lane. As of right now, unless you check your bill, there is no way to tell how much you are being charged and if I have three or more people in my car, I'm not being charged for the toll.
1274	5/17/2022	8	They usually take public transportation, invest in public transportation is the key to lower every one driving's	4	Na	8	Na	Those line are cause more traffic jam, I think keep HOV line will be enough
1273	5/16/2022	7	I want low income drivers to have an inexpensive commute but I don't want to incentivize more miles driven vs taking public transit, for environmental and traffic reasons	2		9	Can't think of any downside, though I'd like for them to be kept from raising rates in an emergency	
1272	5/16/2022	5		8	ELIMINATE TOLLS AND PENALTIES. THE WHOLE CONCEPT OF TOLL ROADS IS FAULTY. AND THERES BEEN TOO MUCH ABUSE BY THE AUTHORITIES IN FAILING TO CANCEL OBVIOUS FALSE VIOLATIONS.	10		ELIMINATE THESE AL HOV AND TOLL LANES. THEY ARE COUNTER PRODUCTIVE AND DO NOTHING TO REDUCE TRAFFIC CONGESTION AND ITS RESULTING AIR POLUTION. THE CONCEPT OF FORCING PEOPLE TO GIVE UP THIER CARS FOR PUBLIC TRANSPORTION OR CARPOOLING IS A PIPEDREAM AND IS NOT REALISITC.

1268	5/16/2022	5	Currently there is a lot of toll evading happening in the toll lanes. I would want to see more ticketing of toll evaders paired with this pilot.	5		0		
1267	5/16/2022	10	The whole idea is classist and is just another way the rich can lord over others how much better their lives are because they have money. It doesn't discourage driving, it makes it more difficult for the people who do.	10	Where is the money from these endeavors going? I would like to know how it is benefiting the LOCAL population.	5	Who is this person and what are their current duties?	People already pay too much in CA. Sad that once elected no one listens.	1	Again. Freeways should be free	1	No comment	Listen to the public. Cadillac lanes serve no purpose. We are already paying the highest taxes in the nation. Shame
1254	5/16/2022	0	We are all paying way too much in gas tax to be forced to pay to use the freeway in any lane. If one has to pay a price, ALL should have to pay the same price.	0	If you make rules, enforce them...wimping out allows plenty of cheating behavior.	0	If we didn't have these stupid pay lanes, we wouldn't have to worry about modifications such as this.	Get rid of toll lanes...they are a waste of driving space.

1237	5/15/2022	10	The toll lane should be abolished. It is a form of elitism allowing the wealthy of the Bay Area to pay for their time while low income individuals are stuck waiting in traffic wasting gas they cannot afford. Tax dollars were used to build these lanes and they should be free for everyone. Rather than dumping more money into these inequitable lanes we should be investing in public transportation that is rapid and reliable.	10	I think anyone making over 120k as a single individual in the Bay Area should be paying exorbitant fees for violating tolls if we're going to keep these stupid lanes. The fees should be income based.	0	This dude needs a pay cut and I don't even know what he makes.	This toll road should be removed and replaced with rapid public transit instead. It's a waste of tax dollar money to be dumping money into solutions that are not scalable or beneficial to low income individuals.

1226	5/15/2022				I am against penalty-related updates. I would however be all for penalty-related reductions to be made by board resolution at a public meeting. I fear that unless worded that way, a penalty update would result in increases penalties.	10		I am against toll lanes. Our taxes should pay for the roads, so why should we pay again to use them?
1225	5/15/2022	0	It's too expensive for all drivers.	5	None	9	None	None
1224	5/15/2022	10	It seems like your projects are all pay to play. It disenfranchise the below poverty and just above poverty level. The bay has increased prices across the board- why are you making our public highway cost more? You should be taxing the tech companies that have increased the population in the bay to cover costs!		I'm not even sure what you are proposing! All toll increases and penalty violation increase should be open for a public vote.	5	If these are public resources shouldn't it be decided by a representative of the public.	Stop creating these pay for fast lane inequitable ridiculousness. It's offensive!
1223	5/15/2022	10	Scrap FasTrak as a whole. The program is a nightmare of false accusations that uses threats of legal action to pressure people to join, or else. I only have one, and have never used it, after being harassed as such.	10	See my previous comment. Its all related.	5		End Fastrak.
1222	5/15/2022	10		5		5		
1221	5/15/2022	0	Make public transit better so people don't have to drive in the first place. Driving is already incredibly highly subsidized.	5	The punishments for driving related infractions versus transit related ones are completely out of proportion with each other. People get fined hundreds of dollars and possibly arrested for hoping a metro turnstile whereas it's a tiny fine for toll roads or illegal parking(something actually very dangerous). This discrepancy needs to be corrected and preferably never involve large fines or interaction with law enforcement	5		Drivers need to start paying the full price that driving imposes on society. All highways should be tolled and this money should be used to take care of our large maintenance backlog and to improve non car options like transit and walking and biking infrastructure. Freeway widening should never ever happen again and be relegated to the pages of history books detailing the pain, destruction and pollution caused by freeways and their seemingly never ending need to be expanded and made larger

1218	5/15/2022	10	Since toll lanes are basically holding a lane for ransom lower prices for the lane are better.	10		10		Toll lanes are basically a way to charge people for what already existed while penalizing people for driving who have no other choice because our public transit can't scale.

Of course there should be future updates.	5	This survey is ridiculous	This was a waste of time. Either lower the rates or don't, but do you really need a public consensus on making things more affordable for people? Who got paid for this?
1213	5/15/2022	5	The express lanes are terrible. Bring back the hov	0	Sounds like a way for friends of board members to get out of fees. They should have a universal application.	5	I don't like vague exceptions. 1208	5/14/2022	0	It's unclear what public policy goal is being served here. Even with a discount people will still be unable to afford using express lanes. Further, such a program will just be attacked as "woke" and not in line with the interest of working people who make just too much to not benefit.	0	This should be a matter for elected officials who are accountable to voters to decide.	7	This shouldn't be an indefinite authority and bounded to days and not weeks or months.	
1207	5/14/2022	0	Discounts for low income drivers cannot be regulated to ensure they are using them appropriately.	0	There does not need to be an increase in the penalties applied.	0		Already having to pay to drive in a lane we as taxpayers in the highest taxed state in the nation is a joke. I strongly oppose any further additional lanes on freeways.

1169	5/13/2022	1	I think instead of offering discount we should try to add another lane to the freeway. Or some places of the freeway where we know is the cause of Traffic. 1165	5/13/2022	10	Yeah those tool lanes are for only people who can afford to pay for them. Further increasing the gap between the rich and the poor. Think about it this way, someone who needs more money to survive is sitting in traffic longer , spending more money on gas so some techie who can work from home to get to the office faster. These lanes will have an impact on the environment as well. But you money grabbers don't care about the environment.	10	Na	5	Na	These tool lanes are a fine example of chasing the people who are actually from this area, out of the area. They have already had to move to Bay Area surrounding areas now you are making it more expensive to drive. Not for the cost of the toll, but for the gridlock they cause. Kills these lanes now.

1164	5/13/2022	0	Express lanes should be removed entirely. It creates bottlenecks and worsens traffic. The only folks who benefit from this are the wealthy who are not bothered by the supply and demand charges or can afford an electric vehicle. Providing programs for lower income folks leaves out the middle class. Why single the middle class out again?	10		0		Overall, the express lanes were a complete waste of public funds. It does not incentive people to take public transit. There are other ways to incentive public transit, such as making it safer, cleaner, more efficient, providing a free public transit pass to demonstrate the systems efficiency. The express lanes today heightens the socioeconomic divide while also decreasing the already failed level of service. The folks who benefit from the express lanes are the wealthy who can afford an electric vehicle or can pay the high supplier and demand charges. The commuters, much of which are low and middle income residents who do not have the luxury of working from home, are forced to either deal with the bottlenecks this lane adds or pay the exorbitant fees with the supply and demand charges. The express lanes were a poor investment of public funds and do not incentive the public transit system. The funds

No one should have to pay \$6+ to visit their family across the bridge when gas is already \$6/ gallon, or pay for a special pass to get to work. The fee starts off small, \$6. However if you are not able to pay it or forget to pay it on time the fee grows to an absurd amount. I once had to pay \$90 to get across the bridge for a friend's wedding shortly after the shutdown was lifted. 1099	5/10/2022	0	I oppose express lanes on principle. You are now trying to solve for low income people a problem caused by the express lanes themselves.	0	If till violations are punished with feeds, then it's just a tax on poor people. Time to get rid of the penalties altogether.	0	Why does anyone need any more authority?	HOV lanes and express lanes do not meet their purported purpose. Time to be done with them.
1098	5/10/2022	9	It's good to give public agencies greater flexibility to responsibly try new policies.	7		8	I am nervous that an emergency will be stupidly defined, such as saying gas prices are high so now we need to give free tolls for years... That would be a bad idea.	These policies are far more difficult to read and understand than necessary. A single sentence would be simple enough: "Should the agencies who run Bay Area toll lanes be able to tweak policies and prices in order to find the fairest, most equitable model of road pricing which serves all residents (with regular citizen oversight of course)?"
1097	5/10/2022	8	How about low-emission vehicles?	9	Single riders with pre-paid admission.	7		Have an annual or biannual permit for single drivers to use the express lane.

1095	5/10/2022	3	The initial proposal is to allow BAIFA to carry out pilot projects. Although the idea for low-income driver discounts is great, it does not include other pilot programs that BAIFA may have. The proposal allows too much autonomy with BAIFA.	7		6		
1094	5/10/2022	10	How about not charging \$7.50 to 2 exits in the particularly busy areas like Martinez to Walnut Creek. It should always be a flat rate not variable I've seen 50 Cent \$0.75 \$3 and \$7.50 for the same two exit trip	5		10		My daily commute involves a \$7 charge to cross a bridge you think I'm going to pay another \$7.50 just to go the last two miles of my journey? The variable rate going up to \$7.50 for just a couple of miles is ridiculous how much are you going to fleece working people? The bridges cost you last now that you're not Manning them with 10 to 12 operators all day and all night why don't you reduce the bridge fees while you're at it? Do something to reduce the cost for working people
1093	5/10/2022	0	The point of the toll lanes is to maintain minimum speeds for multi-occupant vehicles regardless of income, by having a reduced toll for low income drivers, higher income drivers would need to pay even more to keep the lanes at the minimum speed.	0	Sounds like what has been proposed on the various Bay Area bridges where violations are discounted based on income. Sure, give a warning for a first offense, but drivers aren't stupid, if they're violating the law, they should have to pay.	8	Makes sense	
1092	5/10/2022	8	Enabling greater access for equity is important	8	No comments	9	How would emergencies be determined?	No comments

1082	5/10/2022	8	I worry about the accuracy of determine who is low-income	5	Why is this change being considered?	9	As long as the ED's decisions must be explained in writing and ratified/withdrawn by the Board in a timely manner, this feels reasonable	
1081	5/10/2022	10	With all this money please hire the Boring Company to dig new tunnels of lanes UNDER our highways/freeways and exude Express lanes for those instead of making less available to the public. Giving low income discounts doesn't solve the issue of traffic that these lanes cause. Data is showing this is a terrible financial decision for our state. Using the money to build and fund new additional lanes instead of ruining existing is a better solution.	10		2		There is growing discontent across the Bay Area of the expansion of Express Lanes and I will make sure we do not continue to waste state and tax payers funds like this.
1080	5/10/2022	3	It would help low-income families more to fund free youth ac transit passes using fees from full priced lanes	7	The board should be able to change fees and fines, but they should set fees as a percentage as income	0	The board should vote on these things

1063	5/9/2022	8	Will the discount actually be used by low-income drivers in the express lanes? (are low-income users driving that much on freeways nowadays, with gas prices so high?)	9	Please punish serious repeat chronic offenders (toll violators) with PROPORTIONATE fines to deter them from continuing to violate tolls, because it means they aren't affected by the penalties enough and just consider it part of the cost of commuting. (There really were a lot of people who thought this way about carpool lanes, before Fastrak was widespread, and considered a carpool lane violation ticket fine as just part of an annual "cost" of driving illegally in the carpool lane.) Observation: I see toll violators that swerve in and out of the carpool lane to avoid getting tracked by the gantry/cameras/sensors, and then jumping back in the lane again when there is no sensor. This is dangerous for all other drivers in the area.	6

1033	5/8/2022	0	Why should low income not have to pay the same price as others. Why would you segregate and charge based off income. The low income still use the same lane as a higher income person. Why not pay the same for the same access	0	Public should not be effected or have our right to comment or be involved taken from us	1	I believe even with traffic issues and contesting tolls should remain the same and lanes remain dedicated to tolls only. That is a perk to having a HOV Toll lane.	NB i680 toll lane needs to be expedited from Santa Clara county to 580. The project has taken way too long. Same with Southbound direction
1032	5/8/2022	1	This will fill the express lanes with more cars, defeating the purpose of the express lanes.	5		3	Might give the executive director too much power if emergencies are not clearly defined.

1023	5/8/2022	10	Express lanes need to go. Just keep the lanes how they used to be, obviously they drive more revenue but really doesn't change traffic in areas I normally work/drive.	10	Since the toll booths are all automated, how about a decrease in toll since those aren't using up manual labor anymore?	10	Dock pay for unresolved situations and extended delay of response.	Make it make sense. Prices rise and it doesn't seem like we see any result of that revenue. Sure express lanes and fancy signs get put up, but a FREE way for pay is a contradiction.

1011	5/8/2022	10	Tolling the current way is a way to pay for convenience that not all people have access to. It creates an "other" who can't afford faster travel. It sickens me that we do this in our country in 2022	8	Again, some people don't have access to be able to pay fines when caught. Others use fines as "payment".	9

1003	5/8/2022	5	It is unfair that only those of means can afford to is the express lanes. But isn't it also to encourage carpooling? Has the studies been done to estimate usage of carpooling, vehicles that pay the full toll and projected use of those that might use the express line if this discount goes into force? Will the express lane still be "express" with the extra vehicles?	2	Fines are a deterrent. I would hope that was a consideration when they were set in the first place. Also fines/toll fees have been incurred by drivers not in the express line. Please look into that before bringing up other penalty-related issues to the board.	5	It just would be confusing to disseminate the changes. I hope there is a good way to get the word out should a change happen during an emergency.	Express lanes could be a good idea. But it doesn't seem to encourage carpooling. If Revenue is the main reason for them, then it's understandable why they were implemented. The balance between revenue and the inadvertent penalizing of those that cannot afford to pay is rather delicate.
1002	5/8/2022	5	There should be no toll. The express lanes are misused and dangerous as cars dart in and out. The left lane should be for HOV only, no toll.	7		5		The express lanes are a joke. People dodge in and out constantly, making it dangerous to be on either side of the double line. Until there is a barrier or better deterrent, they will be a nuisance. Congestion is made worse by poorly designed merges and badly maintained roads. Fixing all of that should be the priority rather than giving yourselves permission to give discounts or state emergencies.

Hell no. Can't afford it, stay off the toll way and close your legs and quit making babies you cannot provide for. Lots of crack whores and lazy/crazy folks everywhere.	10	I believe Veterans should be exempted from tolls and fees. They/we have paid the price with our dignity, mental health, families and life in some cases; so yes, exempt all Veterans. Standard toll fees for violations will male sure people do not abuse and bully toll-paying folks through road rage, abrupt maneuvers and safety endangerment to other drivers. I think it should be incremental: first violation\$25, next \$50, 3rd \$100, and so on...per yearly cycle. No max limit.	10	There should be some tangible amd exercisable authority granted to the director, but with it, high responsibility. Any exceptions or reductions or waivers to toll fees should be made public. Too many folks are driving here illegally, under false identities and many are just poor drivers who create gridlock and hazards on the road, affecting existing congestion. I think having a high end certification for advamced driving and training to allow for use of HOV lanes, including all two passenger vehicles like pick-ups, convertibles, and motorcycles exempt from all fees. It does not need to be an emergency for the ED make Executive decisions arbitrarily. Empower, entrust and then hold said person accountable through routine review and audits. Provide for more enforcement through CHP and the like. There are a lot of "bad" drivers that for some reason, still are allowed to drive: not using turn signals, cutting people off, continuously applying their brakes for no reason, driving slow, distracted driving and people driving unsafe vehicles that are a general road hazard. 959	5/6/2022	10	I think a low income discount for express lanes is a great idea as low income people are less likely to work from home and will need 880 to commute, allowing them discounts on express lanes reduces the chances of them being late to work due to traffic	5	Toll penalties should be zero.	5	None	Tolls and penalties should be reduced
958	5/6/2022	5	I think that we need to increase the base tolls to subsidize/ offset losses. I'm sympathetic to low income drivers and don't believe this should be a high income only resource. Charging \$3 - 4 / mile probably wouldn't phase people. I also expect some bay area ceos with multi-million dollar stock options and corporate owned homes to try and push themselves into low income status. How do you plan enforcing this?	10	Toll penalties should be increased. 60% of the commuter and express lanes are being taken up by individuals who do not pay, do not have qualified vehicles, and do not feel as if they'll be caught.	10	Yeah, if an emergency is a hurricane or wildfire. If you consider an emergency a 49'ers game.... then no.	Price of toll lanes for less than 3 should be increased. The existing commuter lanes should be converted to multi-dollar toll lanes per mile. If we want a culture that transitions to high occupancy vehicles and public transportation, we need to start enforcing these transitions.
957	5/6/2022	0	Everyone should pay the same. Nothing. Double taxed on highways should be illegal	10	We shouldn't be penalized for using a roadway we already pay taxes on. Pay for use lanes should be illegal. It's double taxation.	0	None	Stop charging us for a roadway we're already paying taxes on!! Double taxation should be illegal!!!
956	5/6/2022	0		10		10		
955	5/6/2022	5	The most important thing is keeping traffic flowing safely, so I'm all for discounts for low-income drivers but it should also make traffic better or at least stay the same.	5		7	This authority could be beneficial and reduce red tape but does give someone potentially a lot of power, so as long as they're making informed decisions this sounds good.

954	5/6/2022	2	I would support discounts but what's the criteria for "low income"? Who the car is registered to? The driver? And is this a sliding scale? The number of toll cheaters is already high (just watch how many single driver have their fastrack set to 3), this would just add to the congestion. I think income level is too arbitrary. For example, my 21 yo daughter drives a car registered to me. She is technically low income, but I am not. She would probably not qualify.	7		8		
953	5/6/2022	0	Why not make it inclusive for everyone??	5		10		
952	5/6/2022	5	I don't trust the decision making of those in charge of this entire project. It feels like another way of gouging money from Californians.	5		5	Get rid of the ridiculous time restrictions on these lanes. There is now MORE traffic at noon on these freeways which slows down drivers and increases pollution. The hours of these lanes should be limited to high traffic commute times, ie 5-9am and 3-7pm.	Please change the 5am-8pm time window. Traveling at noon now has more traffic than ever before because 1-2 lanes have a charge associated with them. This is not good for the public or for the environment. Additionally, what is the money collected being spent on? The quality of driving on 101 is worse than it's ever been.
951	5/6/2022	2	Seems open for abuse with little benefit.	7		9		
950	5/6/2022	7	Currently, express lanes are a luxury item that is unaffordable by those who are low income. To ensure equity when driving - something nearly everyone needs to do to get to their jobs in the Bay Area - discounts should be offered to low income persons.	2	No one "accidentally" violates toll rules: there are numerous signs along the route. Violators should be fined.	8	Living in a natural disaster-prone area, I strongly support modifying rules to help support the efficient movement of people in case of an emergency.	None.
949	5/6/2022	0	Income shouldn't be a factor into whether or not they use the express lane on the contrary, a person who uses the lane due to a medical emergency should get a discount of some sort. It's either you pay for the use of the lane or don't use at all is fair.	10	None	10	There should be a clear definition of emergencies in order to proceed with this	No

948	5/6/2022	1	Either reduce the fare for everyone, or don't reduce it at all. Most "low income" discounts and credits don't ever benefit the real middle class in the Bay Area anyway, who also need the money.	7		6

935	5/6/2022	0	I would much rather see the lanes stay at 2 people for carpool than 3 over giving a discount based on income	0	Signs are clearly posted that lay out violation and toll amounts. People need to follow the law	5	I believe if it is a geographica need, yes it shud be suspended i.e. wild fire, earthquake, etc to make way for an evacuation route.	I commute 30 miles to work and I try to carpool 4 out of 5 days. Having 880 a 3 person required to get free toll seems to much during commute times. As teachers driving from north Fremont to South San Jose.... gas, fuel, and carpool lanes fees can add up. 2 teachers make it do able.... but we don't have a 3rd to take full advantage of carpool.

Allowing solo drivers does not support relieving congested roads.	6	No opinion in favor or opposing	10	Major disaster will need more lanes to hold increased traffic flows. SIG alerts should also open all lanes of traffic to allow faster clearing of congested roads.	The Bay Area needs more lanes to allow a higher amount of traffic flow. The roads do not need lanes that promote a "free ride" for high occupancy cheaters.

908	5/5/2022	0	We all pay exuberant vehicle registration, no one should get any discount.	10	All drivers pay for all of the highway lanes. Yet unless you want to pay MORE you can not use up to TWO lanes in places now!	10	This toll road [swear] is getting out of hand. 893	5/5/2022	10	I am on a fixed budget due to a stroke. We use these highways to reach doctors appointments and other health appointments. Toll lanes help us reach these in a very timely manner. A discount would help us use the toll lanes and not to have to worry about the cost every month as much.	10	Penalties can be very devastating financially. A worry we constantly have. A reevaluation is important.	10		
892	5/5/2022	10	none	10	none	5	none	none
891	5/5/2022	5		0	There are too many people jumping in and out of the lane. If caught the driver should be fined the cost it is now.	10		You should look at how Southern California manages their lanes. I don't see popping in and out like they do here.
890	5/5/2022	0		5		5		The toll lanes are in reality... extortion lanes. They also create an extreme hazard with vehicles lane hopping to avoid the cameras.
889	5/4/2022	10	Fairness to hard working workers who commute.	5		10		
888	5/4/2022	9	Pilot projects, within reason, make sense. One has to test change.	8	It makes sense to be able to modify penalty amounts, especially with how volatile things are.	8	It doesn't say what is defined as an "emergency" here, so hopefully that's laid out pretty clearly.	I feel like toll lane revenue should go specifically toward public transit expansion. I know transit agencies get a cut of the money from the toll lanes in their areas, at least last I read, but the money can be used for anything. I worry that it'll be used to offset any lost revenue instead of investing in infrastructure to expand public transit unless it's specifically earmarked for something.
887	5/4/2022	0	Express lanes should be for HOV 2 or 3 occupants to reduce congestion. single occupancy low-income or high-income should not use express lanes without payment. low income don't get free / discount first class seats in airplanes.	9	Penalties should reflect similar penalties in neighboring communities. Also watch for court fees / costs. have payment plans for low income. waivers for first time low income violations which have verifiable economic hardship	9	When there is an emergency, there does need to be ability to act administratively immediately	Express lane ordinance about 2+ can ride in 3+ lanes and pay 1/2 price is not on any signs. This rule should be more clear about which express lanes it applies to.

886	5/3/2022	0	NO MORE TOLLS! THEY ARE OPPRESSIVE FLAT TAXES THAT HIT LOW INCOME PEOPLE THE HARDEST. Low income travelers are the service economy that has to commute because they can't afford to live in your expensive neighborhoods, and they are the cooks and delivery people who are barely able to survive with huge inflationary increases in costs.	0	NO PENALTIES! NO TOLLS! SEE ABOVE COMMENTS.	0	YOUR INSANITY promotes the death penalty for people who need to evacuate in emergencies and/or prohibitive tolls!	NO TOLLS! Drivers fund the public streets and highways with huge taxes and fees. STOP FINANCIAL PENALTIES AGAINST THOSE WHO HAVE TO COMMUTE AND otherwise have to travel by car.
885	5/3/2022	7	Public transportation would be great Can there be discount for teachers too	7	They should be allowed to pay in installments	5	Non	Improve public transportation on 880 during peak hours and charge only a nominal fee
884	5/3/2022	10	Add companion transit or Commute hour shuttle services for the drivers constrained for money and/or time to take. This is a missing piece in the Express Lane program.	10		10		For the Express Lane Program to succeed in truly getting people move away from driving alone, offer other travel options during commute hours. Be creative in doing that. There are ride-hail/ride-share services that can be employed too.
883	5/3/2022	0	Not in support at all. This gets too complicated and where do you stop? Fare paying are OK and now give free to others? If you carve out more there will be traffic jam on the express lanes, defeating the purpose.	10	Carpool rules of 3 and 2 are confusing on the same corridor of 880. With Covid there are no car pools. It is a joke to ask for 3. Keep all the car pool requirements to 2.	10		REQUEST THAT ALL THE CAR POOL REQUIREMENTS INCLUDING EXPRESS LANES BE TO 2 PER VEHICLE. HAVING 3 IN SOME CORRIDORS IS CONFUSING. ALSO UNIFORM HOURS OF RESTRICTIONS THROUGHOUT THE AREA IS IMPORTANT.

877	5/1/2022	10	A discount for low income drivers is the least that should be done. Preferable would be a way for low income drivers to apply for free access. 870	4/29/2022	5	Rather than giving discount, is it better to have bus routes on express lanes? Looking at data on how express lanes are used and how far people use express lanes to commute, we could possibly get some frequent bus routes.	6		5		More public transit from connecting different cities would be helpful rather than expanding express lanes or modifying the toll prices. Express lanes could become exclusive Bus lanes and have more frequent buses connecting multiple cities. For example if somebody wants to commute from say Castro Valley to Santa Clara, they should be able to do it in maximum of 1 interchange. That's the level of connectivity what I want to emphasize.

It's understandable for a first violation, but after that people need to be accountable.	10	So I'm thinking you mean opening up the lanes for all if there's a big accident. This seems like a good idea. We really have too much traffic for these Lexus lanes in general & it's good if they can be flexible.	The system is just confusing in general. I mostly avoid the lanes already. It would be nice if EV drives could get some clarity w/o having to look up each county as we go.

850	4/28/2022	2	Why, instead of improving transit, are we subsidizing the most expensive, deadly and time consuming option. The job of transit agencies is to move *people*. For the past 70 years, they have become convinced their job is to move cars. Those are not, and have never been, the same thing. Figure out how to move more people cheaper and more efficiently. Hint, that doesn't mean private cars.	0	Again, why are we subsidizing driving which is the #1 cause of child death, young adult death (to age 22), blunt force trauma and GHG emissions. If people don't want to pay the toll or can't afford it, they can take BART.	1	Was just participating in a thread about this today. Cities and transit agencies tend to have a 1950s approach to public safety. The thing that transportation agencies should be most concerned with is the high rate of morbidity and mortality directly caused by our transportation system. That's the emergency directly under your control and exacerbated by outdated, cars first thinking. Deal with that.	The original sin of US transportation policy was to define their role as moving cars rather than people. This is the root cause of all the worst aspects of our transportation system; its high injury and fatality rate, staggering cost, its place as the #1 source of greenhouse gas emissions, noise and air pollution, it's degradation of cities and the economic albatross to low income families of requiring ownership and operation of a car. Your mission is to move people. Cars are the least effective way to do this. And if you can solve for moving people effectively, we will have a safe, affordable, efficient transportation system.

825	4/27/2022	10		5	I think violators should be penalized quite a bit, because it reduces the effectiveness of the lanes. Also, there should be some type of enforcement of crossing double white lines. I see many drivers doing this, and it dramatically reduces the effectiveness of the lanes.	7		Perhaps EVs should get an additional discount for having a carpool of 2 people. Right now, for the 880 lanes at least, there is no difference between an EV with 1 person vs 2 people. I think this will help encourage carpools, because carpools of 3 people are difficult to find, while 2 is much easier.

819	4/27/2022	0	The government provides subsidies and free money, rent assistance, groceries, etc, to low income people. They also pay less in registration (because of lower cost cars) and taxes. We don't need yet another subsidy.	5	None	7	None	It's bad enough we pay the highest state tax in the nation, in addition we pay very high gas tax and registration fees. Toll roads are just another tax on people. The last thing we should be doing is further taxing those with a moderate income to subsidize those with a lower income.

818	4/27/2022	10	The express lanes are a huge money grab and are only dividing the have and have nots in the Bay Area even further. They are making traffic worse and are a horrible idea. As if people aren't facing enough issues with the cost of living in the Bay Area now you want people to pay anywhere from 1 to 8 additional dollars to use roads that have been free for years. And it's not like the quality of the roads has been improved at all. It's ridiculous. None of these pilots are going to be satisfactory. Ridiculous. Do you think people are going to support these money grabs? Seriously.	10	Again this is RIDICULOUS. You're making traffic worse and I've already seen so many drivers skirt the express lanes. 793	4/27/2022	10		4		7		Reduce inequity for service workers who must commute long distances due to high cost of housing in the Bay Area. Toll lanes benefit people who can afford to use them. Find measures that improve transit options. Toll lanes are not broadly beneficial in the way that low cost transit can be.
792	4/27/2022	10	Consideration should be given to Central Valley residents that meet the low income criteria and our regular commuters on the 880 corridor. A toll discount would have a greater benefit to their travel costs given the long driving distances involved for their total trip. Also, a provision for providing some sort of transit discount for low income riders who can take an alternative mode for trips in the corridor should be explored.	10	There should be flexibility so that a first toll offense is a nominal fee, but repeat offenders are charged much greater amounts.	10	This seems appropriate given unexpected occurrences like natural disasters and pandemic where a quick response was needed to change transportation policies that didn't meet a board schedule.	Advancing programs to increase bus transit usage of express lanes (eg public-operated commuter buses) needs to be advanced asap.

786	4/27/2022	2	HOV lanes should be for just that. High occupancy vehicles. Not for EV drivers or people who think they're entitled to drive at any speed they wish. Otherwise, there's no point to having an HOV.	2	Actually need stronger penalties to ensure only those who are supposed to use the lanes do so. Too many examples of people skirting the toll scanners and weaving in and out of the double solid lines. Needs to be zero tolerance.	8	In an emergency, HOV lanes should be open for all until the roadway is cleared to help alleviate traffic backups and lower environmental concerns.	Please consider replacing the double solid lines with pylons or barriers. Too many people merging in and out as they wish because they want to speed. Also, too many people skirting the toll scanners.

782	4/27/2022	10	You should do away with toll lanes it's just another form of tax to use roads that we were already taxed for and it doesn't do much to alleviate traffic as there is no one regional transit option that folks can opt in. So it takes away a lane and cause more traffic. If you want to get people out of their cars build a better regional transportation system	2	Tools are already high ... where does the money go? It be nice to see how funds are being allocated	2	Again... there need to be more clarity and definitions on what this actually means... so if there is an accident on the bridge you could soar that payment to more \$\$making people pay more for just getting to get where they are going... is not a matter of choice... people have to get to work and there isn't always an option of going later or trying to find some to ride with.	While I agree with having carpool lanes ... I think it's a mistake to be charging for them and also the fact that you have now extended the hours from 8 am to 8pm. Just causes more traffic all day. If I have to go to San Jose for work I have no choice but to get in my car otherwise bill be commuting 2 hours one way with different transit agencies.. it's not convenient so I hope in my car as there is no other option
781	4/27/2022	7		5		8		There needs to be an API to access current toll lane pricing. I can't make routing decisions if I don't know what the toll lanes cost until I get there.

717	4/26/2022	5		5	I don't understand the implications of this item based on info provided in the survey.	5	I would need more information about this proposal and its potential implications to have an informed opinion.	The way tolls are presented to drivers is confusing and needs to be revisited. It's impossible to add-up the tolls as you go along as presented now. Additionally, the current cost of taking the entire route (e.g. from Oakland to Milpitas) should be disclosed at the start of the route.
716	4/26/2022	0		0	Penalties should be higher	0		
715	4/26/2022	8	How about piloting not charging at all for lanes that we already paid taxes to build and maintain.	5	You have not specified if they could also *increase* them	10		
714	4/26/2022	7	My main concern about this proposal is that it needs to have a clear underlying understanding of the objective. Right now access to the express lanes are free for cars with 3+ people riding or need to pay a toll. Introducing a reduced toll will be beneficial for low-income people but could produce increased utilization of the express lane making them useless and could also discourage carpooling (If the express lanes are clogged in traffic, why should I carpool?). So that should be probably matched with higher overall prices to balance the utilization of the lanes	2	This is a very wide statement. I get the need to be more flexible and faster in deciding, but there should be a clearly stated approach to that decision-making process and what are the goals?	7

709	4/26/2022	0	If people's incomes are too low, address that. We shouldn't be having low-income people (who, by definition, are not carrying out valuable services) using the express lanes intended for people with high value tasks to be done - delaying those tasks. That's a stupid idea and harmful to our economy.	5		10	As long as emergency is clearly defined and not overly broad, this seems a good idea.	
708	4/26/2022	0	Get ride of the lanes all together, then you won't have to offer a discount. The poor and the rich will use the lanes and the middle class get screwed.	0	No	0	No	Get ride of these pay lanes. They are called FREEways for a reason.
707	4/26/2022	1		5	No discounts for the penalty. If not allowed to use to roads and get caught, you should pay the full fine	10	Emergencies, not politically motivated plandemic's	
706	4/26/2022	8		8		10		
705	4/26/2022	6	I only somewhat support this effort. The primary goal of Express Lanes should be to manage traffic to reduce vehicle miles traveled and funding transit and active transportation. I have not yet seen a study that shows that low-income drivers should get a discount to reach those goals, so I support a discount pilot, but only if it doesn't come at a cost to the goal of managing traffic to reduce vehicle miles traveled and funding transit and active transportation.	6	I somewhat support this effort. The primary goal of toll violation penalties should be to eliminate abuse of Express Lanes. With consistent enforcement and the right pricing, it should regulate itself. If the board decides to reduce toll violation penalties for some people, then it should also RAISE the penalty for others who treat a violation penalty as the cost of doing business so it gets to the goal of reducing abuse of Express Lanes.	7	My support depends on (1) who defines emergencies (ie, is this only for major emergencies like natural disasters and attacks or also for smaller emergencies?) and (2) are there alternative ways to respond to emergencies that don't require the use of a car (ie, if everyone uses a car to escape an emergency, it may cause more congestion, preventing emergency response.). With those in place, then this seems like a good policy.	I've studied Express Lanes and have thought about this a lot, so I hope you take my comments seriously. I know you're trying to balance good policy with politics, and I appreciate your efforts.

687	4/26/2022	5	How do you ensure that they are actually low income? Does that eventually increase the toll for people who make too much to qualify, to make up the revenue lost due to the dicing given to low-income drivers? If so, how do we make sure the cost isn't overly expensive? It's already really expensive to use the lane for regular folks (who aren't going to benefit from the low-income discount).	6	None	5	Don't know what this means. What are some examples of emergencies? 672	4/26/2022	10	Get rid of toll lanes. My taxes pay for the roads, I shouldn't be double charged (taxes AND tolls) to use them.	10		10		
671	4/26/2022	1		9	None	7	None	None
670	4/26/2022	10	On off peak hours (for instance 10am to 3pm) those lanes could be free for some. I see that, even though toll is pretty low, people avoid using those lanes which affects the safety of other lanes. I would like to see them utilized more during off-peak times.	7	There should be no penalties if the system catches license plate of a CA driver. Just bill them whatever the full amount plus \$1 of convenience fee (to incentivize them opening a Fastrak account), that way infrequent users or people out of Bay Area don't have to worry too much. Carpool "fraud", where people set their tags to 3+ when they are riding solo should have harsher penalties.	10	If an accident that blocks at least one lane happens, express lanes should be open to all free of charge until the vehicle is moved out of travel lanes, and a little bit of grace period after that. Enforcement of double white lines should also be suspended during this period, but I guess that requires a CVC change, or a CHP enforcement memo.	Heavy vehicles should be banned, except buses. I hate to be stuck behind some truck that is technically "carpooling" with only 2 people on it since it is a two seater. Also "Lane Hogging" - I hate it when the lane I am paying for is slower than free lanes. I feel like getting ripped off. This needs to be addressed. My suggestion is for off peak hours express lanes should be free and open for all.
669	4/25/2022	0	People should not have to pay more for tolls based on income. People who don't feel they have enough money to pay for the Express Lanes should not take them, regardless of their income level.	7	Sure why not	5	Makes sense in principle, but may be prone to abuse or politicization

664	4/25/2022	0	The express lanes should be free and only for carpool, bus, CAV, and motorcycle only. No one should be able to pay their way out of having to wait in traffic. Express lanes allow solo drivers with high income to bypass traffic while low and moderate income solo drivers wait in traffic. A discount will not help low income drivers, as low income drivers would rather wait in traffic than pay extra. They cannot afford to pay extra every day just to save a little bit of time. It is also unfair to middle class drivers who make up the backbone of the workforce and economy but get no assistance. California drivers already pay exorbitant gas taxes and registration fees. We should be able to drive on the roads without having to pay extra.	5	I'm not sure what the current violation penalty is, but lowering it too much will only create more toll violators.	5	Not sure what would be considered an "emergency". Also, I am not sure how modifying tolls and penalties will help in an emergency.	I have always strongly opposed express lanes. It's a pay-to-play scheme that benefits wealthy drivers and the government. It hurts low and middle class drivers. Californians deserve better. We are the most populous state with one of the highest gas taxes and registration fees in the nation. With that kind of revenue, the roads should be in good working condition and be free to use. Express lane tolling should be eliminated, and express lanes should be converted to free carpool lanes for carpools, buses, CAV, and motorcycles. All this time, money, and manpower spent on express lanes should be diverted to actually fixing and maintaining the state's roadways, bridges, and other transportation infrastructure.

655	4/25/2022	10	This needs to be done. That is the comment. How dare all of you take our tax money and create a privileged lane for yet only the rich to benefit. PS: I'm not poor. I'm just here for equity and fair taxation. Shame on all of you.	5		5	Why is this even a question. Turn the damn thing off if there's an emergency. Are you worried about collecting money and paying for it? Why, you already have taxpayer make money. Ridiculous.	Stop this non-sense. Be better California. Promote carpool, promote a flexible work schedule to help with train and public transportation schedules, that's what you need to focus on. Stop taxing the middle class. The gas tax should have a holiday (seeing as how you have a publicized surplus) and you are still wanting to survey how we feel about a toll? Goodness your privilege is deafening.
654	4/25/2022	10		5		9		While driving on I-880 North & South, many drivers are avoiding express lane tolls by "cheating" the system and crossing the solid white line after passing the toll tag readers/camera to enter the express lane. Then they again cross the solid white line before reaching the next toll tag reader/cameras to avoid the fines associated with using the express lane. These drivers continue this method of avoiding the express lane tolls for at least 8 miles or more. Sometimes, causing drivers in the lane next to the express lane to avoid a collision when being cut off by these drivers who "cheat" to avoid the express lane tolls.
653	4/25/2022	0	People are cheating now, it will only be worse.	0	More people will clog the lanes and you are offering an enticement.	10	It will help with the bigger picture of cars sitting for hours for a simple crash.	The hours are good don't change them.

652	4/25/2022		The tolls should be discontinued entirely for all drivers. Other than making money for those who run the tolls, what is the point of them?		There should be no penalties because there should be no tolls in the first place.		The BAIFA Executive Director shouldn't have any authority to respond to Emergency's because the tolls shouldn't exist in the first place. What is the salary, including benefits, of the BAIFA executive director?	Maybe you can help me find one, but I can't think of a more in your face example of the rich getting richer and the poor getting poorer. How does this reduce traffic? How does this decrease pollution? If the idea of these lanes was to get cars off the road by charging people for them, what's the point of reducing the charge? The whole thing seems quite pointless to me. Obviously, people are making money off of it, and they're the ones who want this in the first place. Otherwise, again, what's the point?

635	4/25/2022	0	Low income drivers should not be given discounts for the lanes. It distorts the price signal being given. Low income drivers should be given subsidies that they can choose to spend however they wish.	8	Support the ability to adjust toll penalties by resolution. Do not support the reduction or penalties broadly. Do support scaling penalty amounts by income.	5	How will emergencies be concluded?	NA
634	4/25/2022	5		10		10		
633	4/25/2022	3	In an economic sense this limits the impact of the express lanes by shifting demand curves and making the overall setup less efficient for everyone	5	Depends what the penalties are that are being relaxed. If it's clear abuse then not in favor, if it's penalties that can result from an honest mistake that's more reasonable. Also perhaps exploring 1-2x grace rather than reducing fines.	10		It's often very hard to see how much express lane tolls will cost due to prices being posted so close to the entrance. This can lead to very dangerous situations to try to move to a non express lane, particularly problematic on express lane onramps such as SB880 - WB237

626	4/25/2022	0	Instead of discounts. Make it free for low-income drivers, those that are carpooling, and front-line workers and service people. All of whom are trying to get to work. Control the flow of 16 wheeler truck to make commutes outside of the packed commuter time. Have these trucks make trips at other times. Encourage carpooling by reducing and making toll free again. Or at least make it free on these express lines. It's getting harder and harder for hte average worker to get to work. Why should the worker bear the responsibility of paying all these tolls to make the economy work.	5	The penalty should not increase as time goes on but should match a portion of the penalizers income. For example, a high-income person should not pay the same amount as a low-income offender. The high-income person should be paying more for the same offense as a lower-income person. They should have differing penalty payments based on their ability to pay. Make it equitable.	5	If you plan to eliminate the benefits of using HOV such as reducing the toll then I am strongly opposed. If you plan on reducing toll then I strongly support it.	
625	4/25/2022	0	Subsidizing driving on this corridor will not solve anyone's problems. Subsidizing transit service to prevent people from being forced to take on the costs of a car would be far better.	5		5

Reduce the hours, and you will find that the traffic flows better.	Reduce the hours!!! Don't give discounts to electric vehicles - they tend to be rich people anyways, why are we giving them a discount?

615	4/25/2022	10	The express lanes are worthless and do nothing to help the communities of the bay area. They are on ALL DAY. Which causes build ups at 11am-2pm that we never used to see before since 1 or 2 lanes of traffic is strictly pay to use/or 3+. Drivers continue to weave in and out of the express lanes to avoid the sensors creating an unsafe environment that didn't exist before. Additionally, we should not have to pay to use a lane of traffic that was built using the tax dollars of the people.	10	There should be no penalties because there should be no toll.	0	The BAIFA should not have authority to do anything. I don't like the idea of a single person controlling the use of major transport routes in the area. Let's have CHP perform law enforcement on our highways, and caltrans can maintain the highways, and that's it..we don't need another regulatory body deciding things from an office while working from home to avoid the traffic they created.	The express lane is a horrendous failure. It creates unsafe conditions, adds to the traffic issue in the bay area, and is an easy way for the government to penny and dime the average citizen. There's is absolutely no benefit to the daily commuter for these express lanes. People hardly even use them, and when they do they don't understand them and get penalized, probably exactly what you guys expected and wanted to happen. Stop non elected officials from increasing expenses on a public road.

Sure, you can offer the program, but I don't think it would have benefitted me when I was low-income. I personally don't imagine many people opting for that expense unless the discount is extreme.	7		10		These tolls and penalties are an elitist response to an infrastructure that doesn't work very well. If you care about the environment, then make the HOV lane 3+ people per vehicle, no cost. Do not charge people to use a public road. Of course, many drivers use the HOV lanes on other roads (I-80 for example) when they're a single occupant anyway. Perhaps just do away with the whole thing. Open up the roads to all and don't restrict a lane's access to those who can afford it.

579	4/25/2022	10		5		10		The rules on how to use the express lane are very confusing
578	4/25/2022	8	The toll roads have appeared to increase gridlock by removing a lane for general use, this in turn seems to have increased the number of incidents that then disproportionately impacts lower income individuals who frequently suffer the most when the commute is unreliable and more penalties for being late. That's an awful position to put this vulnerable population in.	7	Some of the signage along these routes isn't immediately clear. Having flexibility in penalties would be useful to allow for those innocent misunderstandings.	9	It's not clear what the response would be in an emergency or what constitutes an emergency... but charging ridiculous fees in the event of an emergency feels very wrong.	I've used the tolls begrudgingly, and really feel that the traffic was bad enough before them, worse with them because there remains no efficient public transportation to accommodate the commutes people on these freeways need. It feels like charging double where it's known there's no viable reasonable option.
577	4/25/2022	8		3		5	Not enough information to guide an opinion. No examples of what would constitute an emergency.	
576	4/25/2022	5	Toll lanes should be administered as simply as possible on the road. One stated charge for non-carpool, free for carpool. If a discount is applied at billing, that is ok.	5		8		Tolls for carpool should be free, not half off.

571	4/25/2022	2	Creating this program can potentially add more traffic to an already congested Express Lane. This reduces the incentive to even use or pay for it... This discourages the people who carpool to even carpool. If it doesn't benefit me saving me much time, I'll drop carpooling. Inconvenient for me to carpool already.	3	What benefits does giving the board the power??? No explanation provided.	10	Our tax dollars pay for these lanes. Special circumstances should be allowed for emergencies.	None

561	4/24/2022	0	Having selective discounts defeats the purpose of an express lane. I don't trust that the executive director will use that power responsibly	
560	4/24/2022	8	Na	5	Na	5	Na	Na
559	4/24/2022	0	Means-tested solutions don't work because the cost to implement them outweigh any benefit they have to the community. I'd rather see the money spent on improvements to public transportation that can be used and benefited by people of all incomes (such as more frequent bus services in these express lanes), not just lower incomes.	10	The board should have flexibility to design the best set of policies for our transportation network, and to adjust those policies as needed. For example, if we wanted to align pricing and penalties across counties, the Board should have the ability to do so.	8	Sure? This is their job? Why do you need to ask me about this; I trust them to wield their power responsibly.	
558	4/24/2022	0	This proposal would defeat the purpose of the lane. Those that can afford the fees would use the lane and alleviate the pressure on the non-fee Lanes.	0	It seems fair as is.	7

555	4/24/2022	10	If discounts are to be considered, they should be considered for middle-income drivers as well. Much like how Covered California has realized that Health Insurance premium subsidies are needed for those making up to \$90k/year, BAIFA needs to realize this as well. Making \$100k in the Bay Area annually is basically scraping by. \$85k/year salary, for example, makes an individual qualified for Below Market Rate housing in Sunnyvale.	10	What's the goal here? To ensure 100% compliance while in the Express Lane? To increase penalty revenue? I'm not sure what updating toll violation penalties will do.	10	The Toll Administrator or their designee already has this authority today. The Toll Administrator, and in turn BAIFA, has failed to exercise that authority. Tolling was turned off too late Bay Area-wide into the COVID-19 pandemic and still has not been turned back on at the Sunol Grade. With the I-680 Express Lanes through the San Ramon Valley, for example, the Toll Administrator has the authority to respond dynamically to traffic flow, but has hardly ever exercised that discretion. So I don't understand how BAIFA wants to define the executive director's authority when the Toll Administrator (whether that is an appointed person or another MTC contact) already has broad base authority to respond to emergencies today.	The Express Lanes continue to be a rolling failure. During the most congested times, HOT lanes all across the Bay Area continue to show speeds below the federally mandated 45-mph carpool threshold, which HOT lanes were supposed to solve in the first place. This is due to the botched implementation and lack of enforcement. Nitpicking at the scope of authority or implementing discount programs is akin to putting lipstick on a pig. End all Express Lanes now. They're a boondoggle without any enforcement mechanism that even Caltrans employees have been overheard admitting that they cheat in. Shame on MTC for wasting taxpayer money on a failed project.

551	4/24/2022	0	How are you going to identify low-income drivers, when anyone can drive any car?	0	Penalties are already capriciously applied.	5	"Emergencies" not adequately defined. Are we talking about occasional traffic conditions, or vaguely defined emergencies like COVID?	I find the 3-passenger requirement for HOV lanes to be highly discriminatory and not supported by public policy needs. A 2-passenger HOV saves 50% of traffic capacity, while a 3-passenger HOV only saves 17% more. The recent 101 changes near Palo Alto have two HOV lanes that are now unusable by 2-passenger HOVs. When passengers don't live at the same address, a 3-passenger HOV will usually increase highway traffic over a 2-passenger HOV as it requires additional travel in excess of the additional savings.

537	4/24/2022	10	I have always been opposed to the express lanes because it is so unfair for the rich to whiz by the poor who are forced to spend more time driving. I'm glad to see this program.	5	There are so many scofflaws these days. Why make the penalties less, unless it can be established that the signs were confusing.	10	It only makes sense to allow everyone to use all lanes when there is a SIG alert.	I'm opposed to toll roads of any kind in CA. They got everyone to get a Fasstrak to cross the bridges. Now one lane is a toll lane. I fully expect before I retire the toll lanes will increase and the free lanes will decrease. And we won't object much because we aren't handing over real money, just beeping through. I believe this is a long term strategy to get Californians to accept toll roads everywhere possible.

524	4/24/2022	0	Income status should have nothing to do with how much you pay for a toll. If you can't afford the toll, you can't go in the lane. Simple as that. If you can't afford an iPhone, you shouldn't get one. We don't need more government policies providing 'luxuries' to low income.	0	Lowering penalties encourages people to break the law. Make the penalties known and significant. If you break the law, you're liable. Don't break the law, and the size of the fine doesn't matter.	5	This is a bit vague. 511	4/24/2022	5	This question is difficult to answer because I am opposed in principle to the toll lanes. Let me make clear that I am what most would consider well-off and can easily afford the tolls - the issue for me is twofold - one is that I assume the lanes were built with tax dollars - ie. lower-income people who can't afford the lanes also paid for them. Second is that a lane which is not optimally utilized pushes more traffic into the already crowded non-express lanes. In other words, good for some people, bad for others, but IMHO probably a net negative for all drivers compared to opening another lane.	5	This could be a positive or a negative. While I disagree with the express lanes in general - as I commented above - if there is a toll then violation amounts have to be higher than the toll cost times the inverse probability of getting caught - in other words, cheating the tolls can't be allowed to be the "cost-effective option" for regular travelers or fleets.	8		Above and beyond my comments disagreeing with the toll lanes in general, I find the tolls very high on a per-mile basis compared to toll roads I have driven elsewhere.

507	4/24/2022	1	Without knowing the income qualifications it's impossible to support this.	0	Penalty's and fines never reduce unless sitting before a judge. Linking multiple agency fines could cost someone their livelihood.	0	You have to define emergency. Is Covid and emergency? And which direction do you go lees travelers equal higher fees or opposite.	The fast track toll lanes are closed off to normal traffic beyond reasonable commute times. Dedicated toll lanes create congestion and unsafe travel conditions throughout the day. Those lanes were created with taxpayer dollars, making them toll lanes is unconstitutional.

504	4/24/2022	9		5		9		I strongly dislike toll lanes, especially with HOV of 3+. It seems that more and more of public goods (i.e. roadways) are being reserved for the rich. They can always afford the tolls, while the rest of us can't so easily. HOV lanes sound nice in principal, but with so many of us on "at will" schedules, getting together a car pool of 3+ people is extremely difficult. So the rich get to pay to save their time, and the poor pay *with* their time, sitting in traffic, or trying to use what little public transit there is.
503	4/24/2022	0	Either make 880 an expressway with a lane that charges a fee, instead of a FREEWAY or don't.	0	No, make penalties a specific amount as boards usually vote to revise fees upward.	0	Emergency authority is a crock, then the executive director will decide what that person determines is an emergency.	No.

Express / toll lanes should not exist. They make traffic worse. They send the clear message that the government is fine with providing better services for its wealthier residents. It is corrupt in concept. They should all be removed.
500	4/24/2022	10	A shorter time period would be more reasonable. 498	4/24/2022	4	Fees and fines should be a percentage of reported income and should be the same for everyone. If you earn \$20k a \$100 fine would be a lot. 482	4/24/2022	0	Driving on the roads shouldn't matter how much money you make. It's a resource we all need. Rich people and poor people matter the same, there shouldn't be a need for this program at all	0	Enforcement and fines need to be higher. That is the only way to encourage proper use of the lane	5	Not sure what this means	It isn't fair that poor people are stuck in traffic while the rich and get around faster. Enforcement of the lane needs to increase
481	4/24/2022	10		5	penalties should be income-based. \$500 means some people can't pay rent, but for the rich it's just a small fee to get to work faster.	5		I live in the bay area, am low-income, and bought an EV partly for the carpool lane sticker so I could get to work more efficiently. Now the sticker is all but useless on many of our highways. It feels like bait-and-switch.

476	4/24/2022	1	Owning a car is a privilege and not a right. The toll lanes are already excessive and should be encouraging more high occupancy ridership to reduce greenhouse emissions instead of trying to promote single occupancy ridership.	10	This should always be discussed and approved by board resolution.	5	I'm not sure I understand what defines an emergency. If a regional emergency is declared and the highway is the only way to evacuate people, then this should be a no brainer by any high ranking official. If we are talking about localized emergencies in segments of the corridor that may be very temporary, this should not be an executive decision, this is an operational one.	Clarification is needed for vehicles with HOV decals and are not single occupant drivers if they qualify for the HOV free rate.
475	4/24/2022	5	Should these discounts be tied to reason for use - driver is an employee requiring use of faster transit lane, etc. Otherwise, what is to prevent drivers from using money that should pay their living expenses from using these funds in these lanes, then not being able to cover their expenses without support from nonprofits?	5		5	I'm not sure exactly what you mean. Would this be if there was an accident on the highway or would this be if there was an area-wide emergency such as an earthquake?

Would you please consider extending the auxiliary on/off lanes where possible? There's a bottleneck on NB I-880 in Fremont at the truck scales where the express lane has a transition lane to get in and out. At the same location, the on-ramp from the scales extends most of the way toward the Stevenson Blvd off-ramp before ending, causing all the cars into the continuous right lane before allowing cars to exit the freeway. There is enough shoulder room to extend the auxiliary lane all the way to the Stevenson BI exit. That would allow drivers to merge in and out along the entire length of that stretch, and would reduce some of the congestion.

451	4/24/2022	10	We should get rid of these tolls entirely or significantly reduce them, including bridge tolls. The cost of living in California is ridiculously high and an express lane toll hurts lower-income people most. Public transportation/BART is not widespread or reliable enough to justify these costs. They should also be voted on directly (not a bundle of infrastructure projects/funding, but the specific prices or increases) through some form of regional ballot measure. These express lane tolls have longer hours, now require one extra (3 total) person to be free, and effectively eliminate another lane for everyday people. Additionally it isn't right people must pay for an up to \$8 toll potentially twice a day in addition to the insane current gas prices of almost \$6/gallon. This is unacceptable and unsustainable.	7	As stated in my other comments I believe these penalties should be reduced or eliminated entirely. There are too many costs with this system. Any changes should be discussed publicly and voted on accordingly.	7		I will repeat my initial comments for emphasis. 375	4/23/2022	8		10		10		I am COMPLETELY opposed to these toll lanes. They are a travesty you have imposed on us due to the failure of your carpool policies. You should EXTEND car pool lanes AND lower the tolls associated with car pools to create more of an incentive. Car pool hours should be narrowed to peak commuter periods and the lanes open to ALL when car pool hours do not apply.

**Final Public Comment in Response to Proposed BAIFA Toll Facility Ordinance Amendment for Adoption Vote June 22, 2022**

Response	Date	Question 1. How do you feel about offering a discount for low-income drivers on the I-880 Express Lanes for a trial period? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 2. If you have specific comments about carrying out pilot projects on MTC's express lanes such as testing a discount for low-income drivers on the I-880 Express Lanes, please add them here.	Question 3. How do you feel about allowing future updates to toll violation penalty amounts and exceptions to be made by board resolution at a public meeting? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 4. If you have specific comments about allowing future penalty-related updates by board resolution at a public meeting, please add them here.	Question 5. How do you feel about defining the BAIFA executive director's authority to respond to emergencies? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 6. If you have specific comments about the BAIFA executive director's authority to respond to emergencies, please add them here.	Question 7. If you have any other comments, please add them here.
366	4/23/2022	10	Discount for commuters that cross a bridge everyday. Sort of like prepaid bus or train cards.	5		5		Motorcycles should Automatically receive their toll discount regardless of they have a transponder or not. The agency knows just by the plate # that the vehicle is a motorcycle and there is often nowhere good to attach the transponder to a motorcycle
365	4/23/2022	10		10		5		
364	4/23/2022	0	That is not fair. Use the free lanes.	8		8		
363	4/23/2022	5	How will you determine that the operator of the vehicle containing the transponder is low income? What is to stop someone from falsifying this information, or using someone else's transponder?	7	First of all, I am concerned about the legality of making part of a federally funded interstate system HOV and/or a toll road, even if it is only a portion. This is a roadway that all tax paying Americans pay for, now you want to exclude those that aren't in a carpool (the definition of which changes arbitrarily), or those not willing to pay a fee on top the taxes we are already paying. I don't agree with that.	5	I don't understand what this means. Some bureaucrat somewhere gets to decide if there is an emergency that will justify opening up the toll lane for free usage, or are they going to increase the price because demand is higher? Sounds like another way to extort more money out of people.	I do not like toll lanes. I do not like HOV lanes. Traffic is bad in the Bay Area, we need more lanes for everyone, not just those that can afford an electric car, plug in hybrid, or to pay tolls to get to work. Tolls that, by the way increase during high demand, which is when most people are driving to work. Gas in the Bay Area is already the highest in the lower 48. This is just another money grab from greedy governments.
362	4/23/2022	0	The idea behind express lanes is for tolls to pay freeway expansion. Can't pay then dont use.	8		10		
361	4/23/2022	0		6		5	Your description tells me nothing	
360	4/23/2022	8	1. Proof of low income must be handled with 100% privacy/security. 2. Should be open to non-citizens and those without legal permanent residency (green cards)	8	This survey should explain HOW MUCH current penalties are so respondents can make an informed response.	8	Somebody should have that power already, like the county sheriffs and/or high-ranking CHP officers!	
359	4/23/2022	0	If you can't afford to pay the toll, you can't afford to drive. Tired of subsidies for low income families.	10		10		
358	4/23/2022	10	it seems there is lax enforcement for violators. I'm too worries to use express lanes as violators would just swerve or some would just use it even without fastrak flex!	0		5

357	4/23/2022	4	It doesn't address congestion or environmental factors. It's compassionate towards some, obviously, but I'm overall not convinced.	8	This question is a bit disingenuous; you're not making clear what the alternatives are.	10	This seems pretty obvious.	
356	4/23/2022	8		8		10		
355	4/23/2022	0	Such a discount disincentives public transportation.	0	No reason to encourage violations.	5	Don't feel strongly either way	
354	4/23/2022	10	No tolls at all	5	No tolls ever	5	Let any car use any lane	Why charge? Some tolls I see are as much as \$14. Just a wee punishing except for oligarchs
353	4/23/2022	10		5		7		
352	4/23/2022	2	I feel express lanes are working good the way they are. If you start changing them they'll become crowded.	0	Need to discourage violators already have people jumping in and out breaking the law.	2	Should be extreme emergency if your going to change rules.	
351	4/23/2022	8		4	No need to reduce penalties.	9

345	4/23/2022	10		5		10		
344	4/23/2022	1	With the cost of living, work/commuting expenses and inflation, most drives qualify under the 'low-income' bracket anyway. Why 'test' a discount, only to take it away later? It's just a tease. Unnecessary.	9		9		
343	4/23/2022	10		6		3		
342	4/23/2022	10		8		10		
341	4/23/2022	10	No	10	No	5	No	The tolls are VERY expensive
340	4/23/2022	3	When our regional goals are to reduce VMT and build more workforce housing near employment centers, this feels very much like a bandaid on a far greater issue. If 880 required tolls for all road users (not just express lane), I would be more supportive.	0	Firmly opposed to this. Fees, when enforced and levied, are a disincentive to violating rules of the road. Again, feels very misguided and fails to address the underlying issue.	7	Supportive in concept, but would want more information about how emergencies would be defined, and maximum duration without additional review and public comment/vote by MTC Board

339	4/23/2022	8	I'm mixed. Honestly, the system we have doesn't work. Express lane tolling just allows those with money the chance to be on time, and those without have to wait. They don't serve the full purpose, which is to encourage less driving in general (or better driving habits, such as carpooling, public transit, or e-vehicles.) But at the same time, it's not fair that drivers that can afford the express lanes can take advantage of them while lower-income drivers cannot. I support the idea of this as a start, but it should be coupled with better investment in public transit to make the commute better for everyone - no matter your income level.	5	If your goal is equity, reducing toll violations overall may not get you there. Consider a sliding scale for violations, with penalties determined by income, etc.	10	I thought this was already a thing. We should absolutely not be charging tolls in an emergency.	Again, I appreciate the thought into making tolls more accessible for all, but the way to truly support everyone in the Bay Area is investment in quality, cheap, public transit.
338	4/23/2022	7	Don't remove electric car free access. Encourage electric purchases and clean air	8		9		
337	4/23/2022	8	How about charging based on income quintiles in general? Not just a discount for poor people	2	Penalties shouldn't be lowered as it may encourage more violations by those who can afford the fees. How about charging penalties based in income instead?	5	None	Using income quintiles to determine fees and penalties is a fairer way to do things than just having discounts and exemptions for the poor
336	4/23/2022	10		1		1		
335	4/23/2022	0		7		7		
334	4/23/2022	5		5		10		
333	4/23/2022	0	Low income programs already include, food, housing, transportation, etc. Middle income households support this through taxes but never receive benefits or tax breaks.	5		5		The 680 express lanes effectively reduce the number of lanes to ONE for non-HOV vehicles because trucks use/block the two right lanes. This is a problem even during non-commute hours, by creating commute hour problems 24/7.
332	4/23/2022	2	I believe the test period is too long. You need 36 months of data. 12 months max!!	0	It would just be another example of rule breakers getting away with it. Ridiculous	2	Devil in the details but could have some merits.

328	4/23/2022	3	MTC's express HOV lane is ending for electric vehicles, which I am not happy about. I hope this changes. The HOV express lane is for the environment. Giving low income polluters the lane does not make our state better. It would be much smarter to give low income drivers a discount on electric cars.	4		9	I would also make the HOV lane available at a discount for more times and longer times periods. I would add days like weekends to the possible FLEX pass discount as well.	I am shocked to hear that the HOV lane discount may be ending in 2025. This is very disappointing. Why can't the HOV sticker program go beyond this date? Why would the HOV lane times be as limited as they are. The environment unfortunately can't wait. We mas support clean vehicles in CA and be a model for other states. Thank you.

314	4/23/2022	0	I believe express lanes should be ban. This is extortion	5	Suppose to be no express lanes	0		Express lanes on 880 become a major obstacle for regular traffic flow. They form permanent traffic jams all along the road. It must be reversed to HOV lines
313	4/23/2022	0		10		5	Prefer there to be a council to make a decision together rather than an individual	
312	4/23/2022	0		5		10		
311	4/23/2022	0	The express lanes should be to encourage carpool (to reduce emissions) and encourage electric vehicles! The tolls are a deterrent and should be higher. Please keep it that way
310	4/23/2022	0	Get rid of the toll lanes. Is your plan to have special lanes for the rich and poor folks, while the middle class sits in traffic. Dumb idea. Why segregate us by money? Aren't we all in this together?	0	Get rid of toll lanes - it's not fair that rich folks can avoid traffic but the rest of us can't. And now you're planning to reduce penalties? Why?	10

306	4/23/2022	10	Try putting BART tracks on all Bay Area freeway fast lanes. Seriously.	10	Fast track past due penalties climb quickly to astronomical annual interest rates.	10	Years ago, in order to get federal funding, counties had to do war planning that involved reversing the flow on freeways and having ALL lanes on both sides go the same way. Now for wildfires?	If you look into the history of freeways, you'll find that they were inspired by Hitler (with help from Henry Ford, who was Hitler's inspiration). I like cars, but express lanes, etc. are a band aid on a cancer that involves NIMBY resistance to housing near jobs, and lobbying by the oil and car industries. Freeways have set U.S. city planning back 100 years. Please, think BIG and FAR into the future! Think transit. Thanks.

303	4/23/2022	0		10		0		
302	4/23/2022	10	The express lane tolls are an outright attack on middle to low income people. I see people everyday with only one person in the car(only the driver) have their toll tags set to 3 occupants so they're not charged. You're forcing people to break the law because they cannot afford to pay due to the fact that the civil planning and engineering of Bay Area roadways is such a sh#t-show.	0	The tolls should be eliminated People of low to middle income should not be attacked	0	Abolish the tolls, they're an attack on low to middle income people

HOV lanes should be strictly 2+ and no exceptions for EVs or other 'get outs'. I also oppose narrowing sections of highway when express lanes are added, for example where the 880 North has been narrowed between Auto Mall and Stevenson to create a bottleneck and force the use of the express lane (despite there being a massive space on the shoulder for another lane)

296	4/23/2022	10	Consider 62 and older also.	10	Penalties are too high everywhere. Consider lowering them a lot more than the lowest one you find.	5	Need more details about what is considered an emergency and who is allowed exceptions.	I do not like the toll system at all. I think it remains to keep a bureaucracy running. Any evidence that shows these tolls are slowing traffic down is not even considered by the "authorities".
295	4/23/2022	0	Negates the entire purpose of express lanes and what they were designed for. Allow for more commuter/transit/HOV vehicles to use the lane and/or increase their routes so low income individuals can ride them, not drive themselves.	0	Again, this negates the entire reason of how express lanes work. If anything we need stronger penalties for violators. We have too many who use the lane today and then cut over the double lanes right before the toll cameras.	0		Seems to me this entire possible project is changing what express lanes were designed to do by creating exceptions. Don't let this happen.
294	4/23/2022	0		1		8		
293	4/23/2022	1	Please define low-income	5	Those who violate the lane rules should be fined highly. The only way this truly works is if EVERYONE (rich or poor people) follows the rules!	10

287	4/23/2022	5	The extortion lanes are a travesty and irresponsible use of public funds. As they will likely never be abolished, the hours should be adjusted to ONLY rush-hour direction and times 6-9am 4-7pm maximum.	0	IF the Extortion lanes are to exist, then MAXIMUM penalties should be in place all the time they are in operation (which should ONLY be primary commute direction and commute times 6-9am & 4-7pm). BUT that has proven fruitless for most highway traffic violations involving the carpool lanes, so why would the extortion lanes be any different?	10	If any lane is shut down, then all available lanes should be FREE for all to use... as ALL LANES SHOULD BE FREE FOR ALL TO USE! Simply put, any lanes constructed with public funds should be freely available for all legal drivers to use.	The Extortion Lanes shouldn't exist. The whole concept of reducing lanes (yes, that is exactly what these "lanes" do) at peak usage times is at best IDIOTIC and wholly goes against reality... and physics. Why would any rational person choose to reduce flow of major traffic arteries at the times of greatest need??? I guess the "traffic engineers'" neck ties were too tight when they came up with this crackpot scheme of a cash grab. Restriction of blood flow to the brain is a perfect analogy. As it is unlikely that this brain-dead Scheme will ever be shut down, then it needs to be modified to lessen the significant inconvenience to the daily non-commute driver. Any observant dolt can plainly see that the Extortion Lanes have a very small following among rational and practical drivers, thus the remaining lanes are packed while the Extortion Lanes lay empty. That's not thrifty. Here's another thing... the whole idea of a "carpool lane" was to

267	4/22/2022	1	I HATE the whole concept of pay-to-drive express lanes for ALL drivers. The system needs to be scrapped ENTIRELY.	5	It is LITERALLY impossible to understand, gauge, or even predict what this statement is saying. I have zero idea if the implications for myself or anyone else.	10	If this statement means that rules for express lanes (bleugh!), HOV lanes, etc. are rescinded if we're all trying to avoid tsunamis, earthquakes, wildfires, then... duh! 209	4/22/2022	0	What do you hope to understand better but doing this? I would prefer that you not have Express Lanes in the first place since it does create two different classes of drivers on roads payed for b y ublic funds.	5		0	There is an increasing tendency to vest unchecked power in fewer and fewer people. If you need to adjust for emergencies, think through what those emergencies might be and develop policies that respond appropriately without leaving this authority in the hands of a director, who I don't know, of whom I have never hears, and most certainly did not vote for. I am suspicious of nebulous "administrative power" when it is clearly not necessary simply because it is administratively more convenient.	Let's get rid of toll roads, toll lanes and toll bridges which are essentially taxes unequally borne by everyone, frequently esscalated "automatically" by ill-thought out measures and referendums and strike those who are poor, culturally disadvantages or elderly, living on fixed incomes, unequally. They create a systems of violations and penalties that are unevenly enforced because the expenses to do so are enormous. Roads and bridges should be built and financed with tax dollars and the burden of costs borne equally by all citizens, not just bridge and tunnel commuters or the wealthy who are able to afford automobiles that do not run on petroleum and therefore escape gasoline taxes.
208	4/22/2022	0	Unless wages go up along with said plan, it's another unaffordable inity in ones life along with more stress for the commuters who's choice is only driving.	0	With a State such as California, We Americans of California in particular, have to suffer expensive back lash for Such Boards and they have the say so at the end of the day. 206	4/22/2022	10	Toll lanes are essentially a poverty tax. People who sit in traffic from areas 680 and 880 travel to from SF or SJ cannot afford to live in SF or SJ proper and are often crucial to their employers' infrastructures. Helping them not pay for an express toll would greatly benefit them financially and their employers.	5	Please don't increase penalties or tolls. 134	4/22/2022	0	This discount will reduce revenues. Yes, it's unfair that the rich can more easily afford these fast lanes. Same with soda taxes, the gas tax, driver license fees, etc. But means testing every single tax, fee, and toll is too much bureaucracy and overhead. Our progressive income tax and Earned Income Tax Credit efficiently solve this problem in one place, instead of means testing every program separately. And California already has the most progressive and equitable taxation and fees in the country ( see ITEP "Who Pays" study). Instead of spending money on this discount, tax credits and tax rebates let us spend on what we want: express lanes, an EV, or public transit!	2	What was the previous way to update penalties? I really can't comment without comparing the two.	5		Equal and consistent enforcement is key to social cohesion and trust. Right now, we have some societal distrust and people think other people cheat.

91	4/21/2022	2	Having low income means nothin. I don't think there should be tolls as my taxes are used to build these roads and I am frequently alone so to use them I have to pay AGAIN beyond taxes. The long hours set for tolls on 101 are ridiculous	2	Your questions on this are confusing. What are you reducing or excusing and who has that authority	2	Please - this state does not need more power hungry dictators	Cut the tolls ; allow people to opt out of paying taxes that build toll roads. Next thing you know - California will sell toll rights to a 3rd party like they did in Toronto
90	4/21/2022	10	It seems deeply problematic to allow wealthy drivers to speed through 880 while most of the residents who live nearby are low income and will have more trouble paying the toll. Those living along the 880 corridor get all the air quality and noise impacts - offering a discount on the express lane isn't much, but it is better than nothing.	8	Life is complex, and providing the opportunity to have a toll reexamined could make a difference for someone who violated the rule out of desperation.	5	The language above is a little vague. I would support more based on specific limitations of the ED's authority.

84	4/21/2022	10	Freeway should be free for all. There shouldn't be confusion whether you can use the lane or not. You took out one lane and this will create more traffic. Keep in carpool free 5am-10am and 3pm-8pm with 2 people or more!	10	Good luck collecting the proper tolls. It is not fair if some drivers do not register their cars and you can't bill them. The rest of us pays for the difference in revenue that you're missing!	6	I don't understand.	Do away with the Pay lanes! Fastrak algorithm sucks, takes more money from people than needs to. Not every Californian is rich. How about tourists who rent cars, who pays when they violate the HOV restrictions?
83	4/21/2022	9		5		9		They should be hov lanes all the time. Rich people shouldn't get to pay extra to skip traffic. Hov lanes have positive externalities by discouraging individual driving
82	4/21/2022	0	Any driver regardless of status should pay the same rate for express lanes.	0	No exceptions. If there is a violation, pay!	10	Emergencies should have lower penalties.	A law abiding driver should have no difficulty in observing not to cross the penalty line.

80	4/21/2022	0	How do you plan to identify low income drivers? People scam EDD all of the time. Why should I pay for other people? Maybe I should just quit my job and live off of other peoples money through the government.	5		0	Hell no!

78	4/21/2022	0		5		10		There must be an increase in accidents on 680 since adding the tolls. I find it very dangerous
77	4/21/2022	10	That's great because the express lane goes through union city. The city of union city is expecting us to pay \$15 toll with a \$16 dollar/hour just look at union city careers. How could I afford a toll if union city only wants under \$20 with our tax rate being one of the highest.	7	Should encourage automatic payment	8		The express lane runs through very low income households. Starting at union city north bound.
76	4/21/2022	0	think carefully first	0		0		
75	4/21/2022	10	This should've been done first instead of forcing it on everyone. The pilots must also be evaluated by independent, impartial, studies on their efficacy.	6	The penalties mean nothing if the CHP doesn't care, which it quite literally does not even when patrolling the lanes, when they instead care more about double white line crossing. This is a misuse of CHP resources better dedicated to getting actual bad behavior, like driving slow in the express lanes, to stop.	7	It should only ever decrease or remove tolls, not increase them.	The express lanes program, particularly tolling during previously open to all hours (10 am to 3 pm in most cases) and charging HOV 2, was really bad and should be independently audited. Even with the model in place, Fastrak is fundamentally flawed in assuming the full toll when the flex tag doesn't read and the license plate reads instead, even when the sensor itself is defective.

71	4/21/2022	0	I hate these lanes, it's just a tax on commuters	0	Whether public or private, the board is going to do whatever suits the board. Eliminate these pay roads.	0	I don't want any executive making decisions for public interest. Put it up to a public vote if you want public opinion driven decisions	Every time I use the toll lane, I have to dispute the charge. I drive an EV, and even though I have a transponder, it doesn't work. The system should know my car is an EV by now, and just not charge me; but no, every time I use the lane, I have to dispute the charge. **Final Public Comment in Response to Proposed BAIFA Toll Facility Ordinance Amendment for Adoption Vote June 22, 2022**

Response	Date	Question 1. How do you feel about offering a discount for low-income drivers on the I-880 Express Lanes for a trial period? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 2. If you have specific comments about carrying out pilot projects on MTC's express lanes such as testing a discount for low-income drivers on the I-880 Express Lanes, please add them here.	Question 3. How do you feel about allowing future updates to toll violation penalty amounts and exceptions to be made by board resolution at a public meeting? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 4. If you have specific comments about allowing future penalty-related updates by board resolution at a public meeting, please add them here.	Question 5. How do you feel about defining the BAIFA executive director's authority to respond to emergencies? [0 = Strongly Oppose; 5 = Neutral; 10 = Strongly Support]	Question 6. 52	4/21/2022	0	Tolls should be based on usage/miles . . a "user" fee not based on high/low or other income. It's starting to bastardize the original intent of tolls. Bridges introduced tolls based simply on "user"/"usage" tolls . .that's the way roads should be. Not for the privileged, entitled, etc.	0	"Penalties" always have unintended consequences or harm people in different ways. Just keep stuff simple and don't try to be too enlightened on the topic. A simple, clear, "fair" fee should be assessed and repeat violators should pay more on an increasing/higher level.	10	You should be able to respond accordingly to emergencies when needed and based on type/occurrence/frequency/etc.	Stop making toll lanes and roads only for the elite. You are doing more than just regulating roads. You're ruining the American dream and making things more like Russia/China/communism. Keep roads free/open/affordable to all and congestion free

50	4/21/2022	5	I do not think there should be tolls or express lanes at all. Taking a lane out of normal use and then underutilizing it does not ease traffic congestion. Having tolls or express lanes is a regressive policy in that it affects or burdens those who cannot afford to live in the Bay Area.	5		8		I really don't think there should be additional tolls or express lanes in the Bay Area. We all contributed to the funding of the roadways through our registration fees and the gas taxes we all pay. These additional tolls and express lanes burden those who cannot afford to pay and everybody else in general by creating more congestion. The express lanes cause additional congestion by removing a lane from regular use and then underutilizing it. The express lanes also cause additional congestion because people have to cut all the way from the left lane to get to their exit. This causes additional slowdowns and potential accidents around major exits and interchanges.

We want all the billions of dollars spent on roads!

34	4/21/2022	0	Allowing paid usage of HOV lanes is bad enough.... and now offering discount?? HOV lanes should be used for HOVs only!	0	Sounds like leaving the fox to guard the hens. Changes shouldn't be board's discretion.	5

30	4/21/2022		Money collected from all tolls on the express lanes should be used to facilitate the creation a system of new, paralell, improved and fully subsidized transit, carpool and cycling alternatives for low income residents not for subsidizing drive alone car trips for low income users. Please do not pay for drive alone users of the express lanes.		Penalties need to be higher than the costs saved by cheaters. Keep the penalty prices as high as possible.	10		Increase the ceilings on the costs to use the express lanes to keep the lanes moving. Express lanes are too cheap and penalties for cheating are too low.
29	4/21/2022	7		5	Is this an attempt to increase equity? Would the public have more or less influence in setting penalties with resolution compared to current practice (whatever it is now)?	2	Since you do not define emergency, this is too vague to support.

26	4/21/2022	5	What is considered low income? It better be something reasonable like under 300k	10	Why are there even tolls stop pocketing the tax payers dollars	1		
25	4/21/2022	0	The express lane is a tax on the middle class. Reducing costs only further shifts the burden to the middle class commuter. If low income doesn't have to pay and the toll doesn't impact wealthier drivers, by default the middle class will carry an inordinate amount of the toll burden. We should not pay a toll on a road our taxes paid for, this is like HBO having commercials. When you already pay for a service, you shouldn't be charged to use it too.	0		0

15	4/21/2022	N/A (email)	N/A (email)	N/A (email)	N/A (email)	N/A (email)	N/A (email)	MTC must get serious about promoting carpooling as a way to both cut GHG emissions, and take advantage of the available highway capacity inside commuters' cars. To take full advantage of the available HOV network, including HOT lanes, 3+ (minimum) carpools, van pools, and transit vehicles should travel toll-free. Carpooling must be supported by a robust, convenient, intuitive on-line carpooling application. Bay Bridge needs HOV lanes in both directions with designated SF ramps to bypass congestion. Furthermore, HOV lanes must begin to conform with FHWA HOV lane standards to make them attractive to those who carpool. This would be a low-cost program that could be implemented fairly quickly. I would like to know why MTC does not take a stronger pro-carpooling stance.
