

Bay Bridge Forward Update and Contract Approvals

Regional Network Management Committee
November 3, 2023

Transit Priority Efforts

Background: Investing in transit priority throughout the Bay Area roadway network is one of many strategies adopted by MTC to **improve the transit customer experience and encourage more people to use transit.**

Purpose: Better serving existing riders and encouraging new riders works towards the overarching **climate and equity goals** of Plan Bay Area 2050 (PBA 2050) and the Transit Transformation Action Plan (TAP).

Results for Riders: Current efforts underway emphasizing near-term implementation to make transit faster and more reliable include:

Forward Commute Initiatives

(including HOV policy)

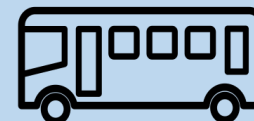

Innovative Deployments to Enhance Arterials: Transit Signal Priority

(IDEA TSP)

Bus Accelerated Infrastructure Delivery

(BusAID)

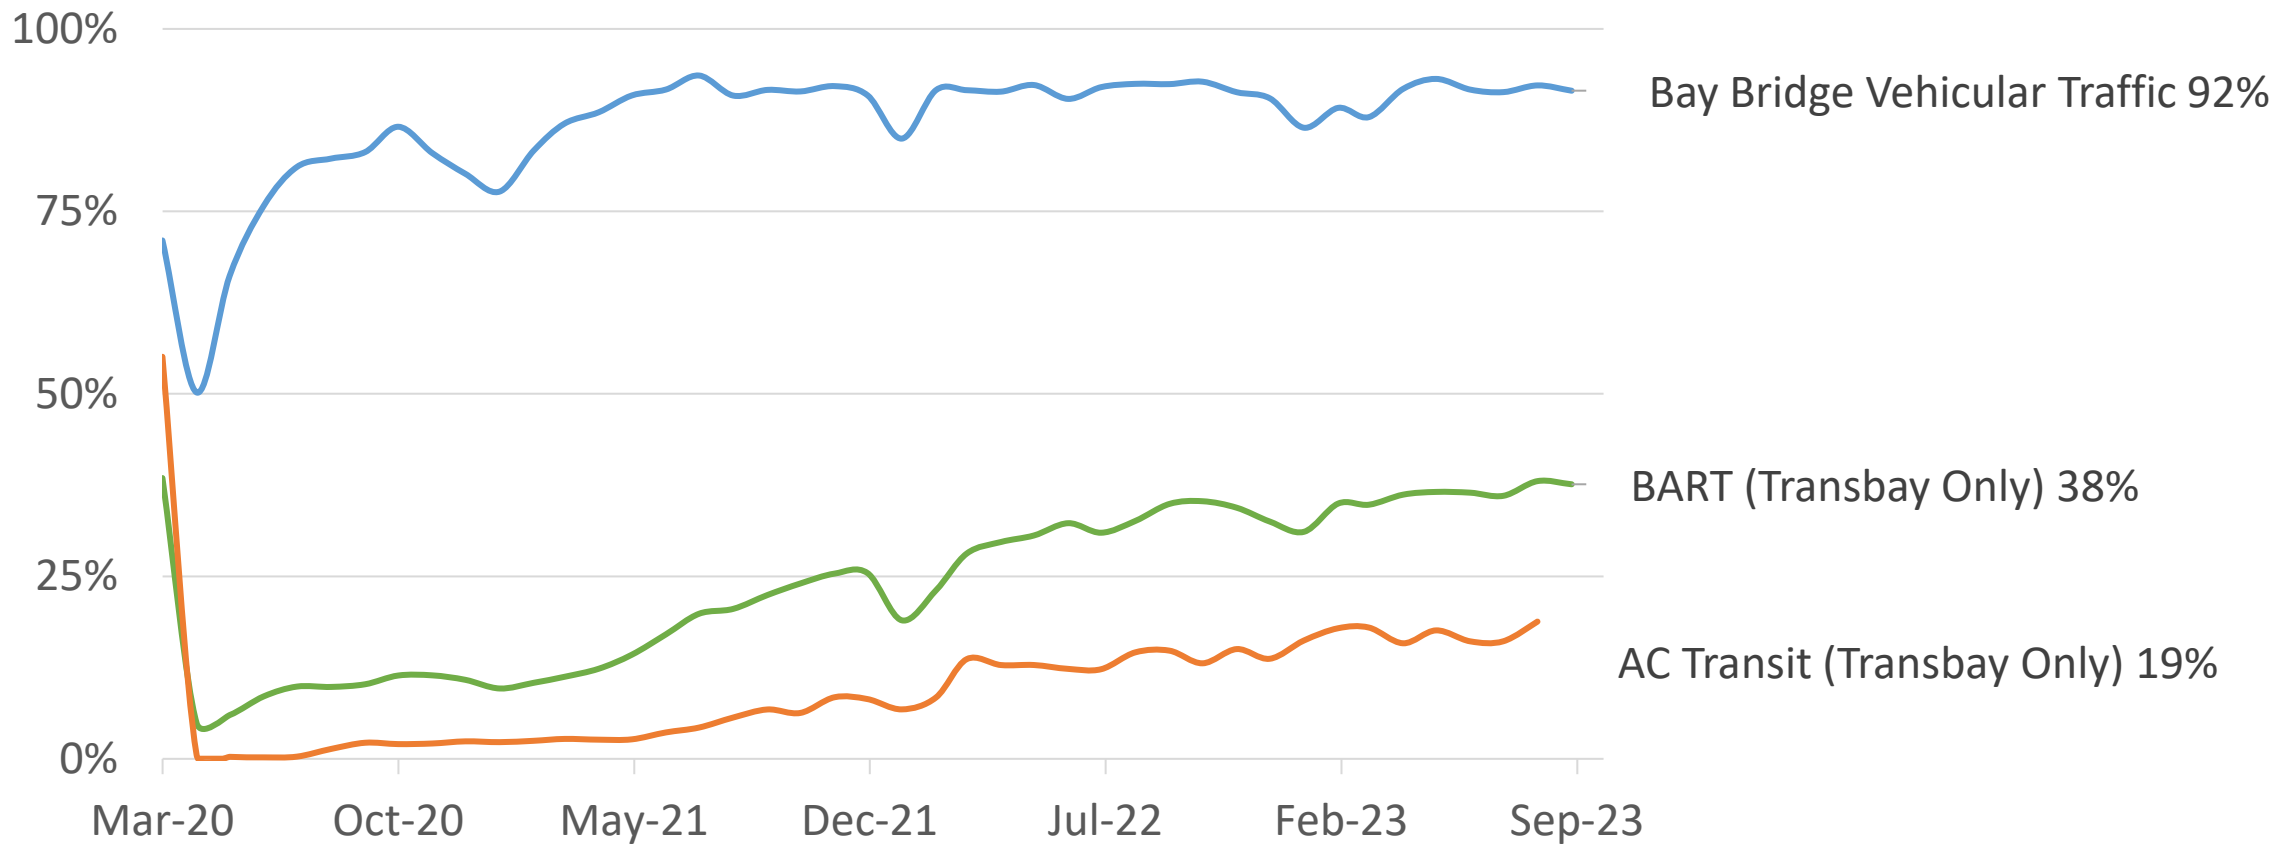

Regional Transit Priority Policy

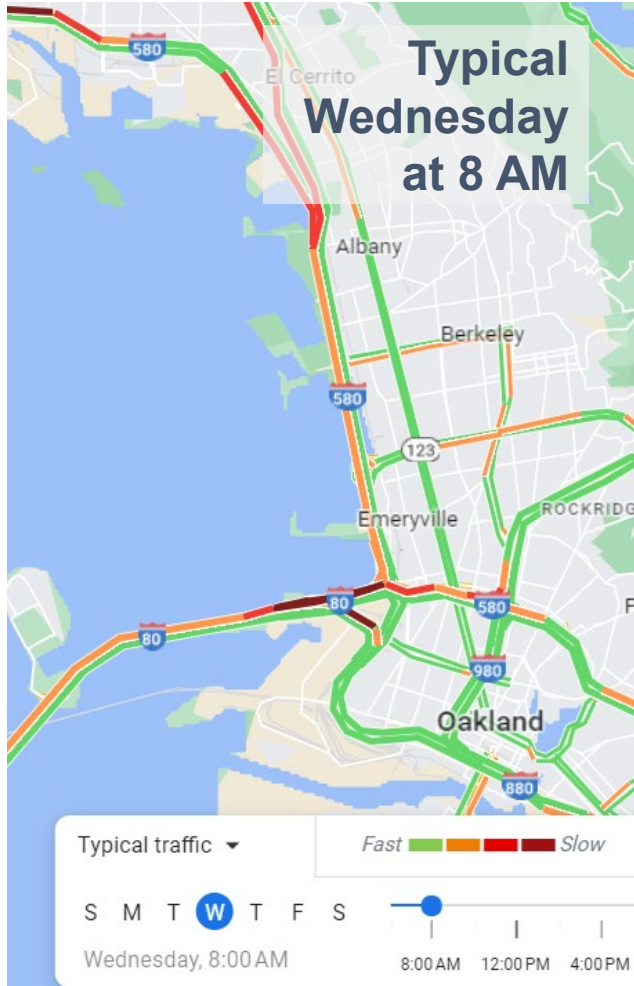

Recovery of Traffic vs. Transit

Monthly volumes compared to analogous months in 2019

Current AM Commute to SF

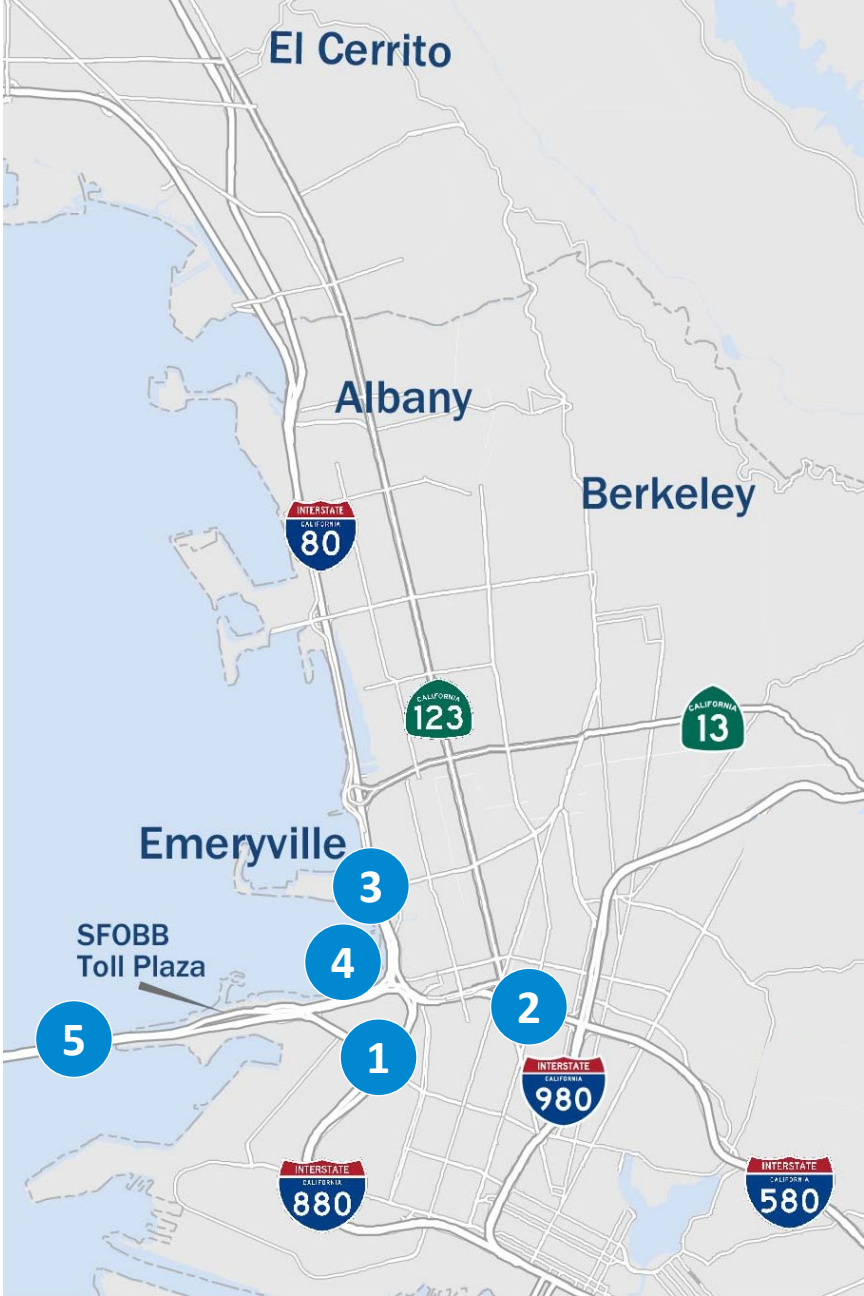

Approaches to the Bay Bridge are more congested than the bridge

Ongoing BBF Projects

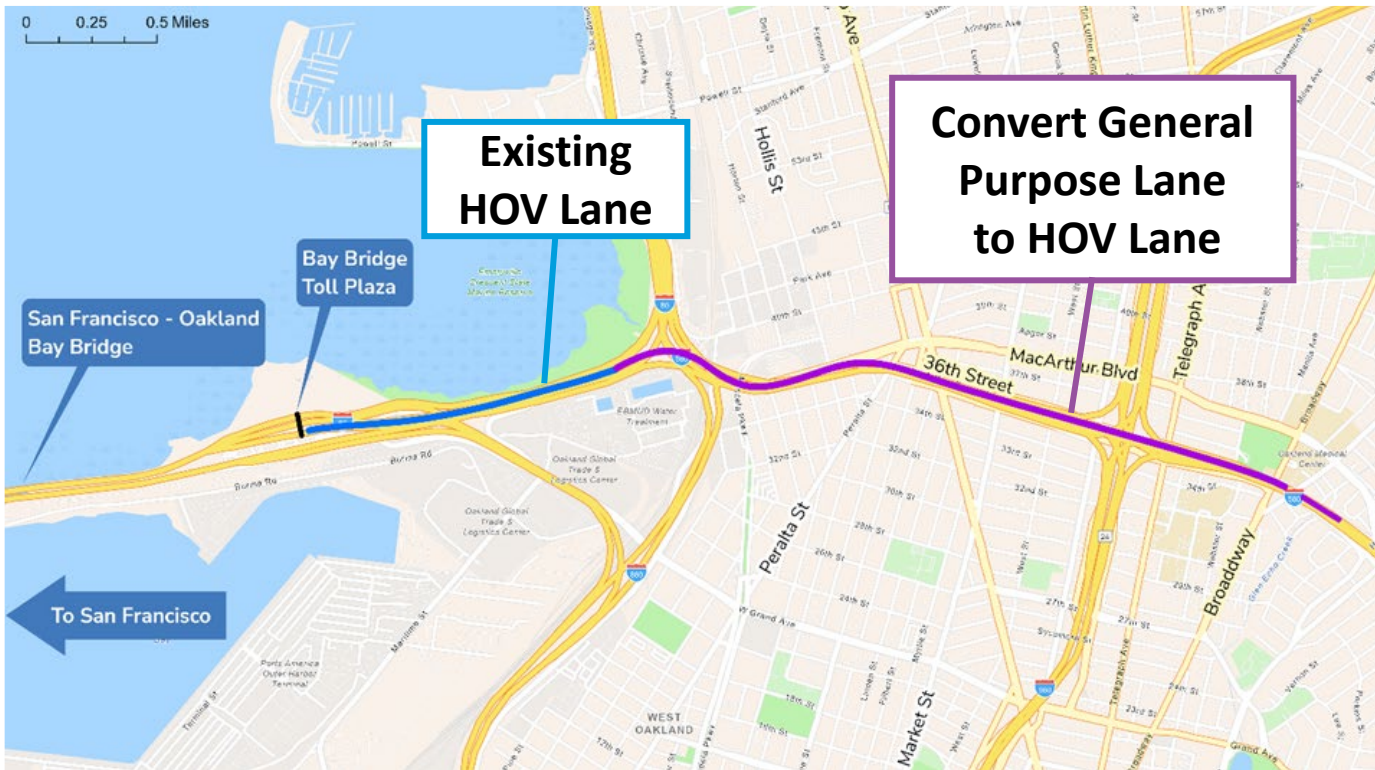

No.	Project	Current Phase
1	West Grand Bus/HOV Lane Extension	Final design
2	I-580 Westbound HOV Lane Extension	Environmental
3	I-80 Powell Interchange Transit Improvements	Final design
4	I-80 Westbound Bus/HOV Lane Project	Preliminary Engineering
5	Smart Transbay Transit	Planning

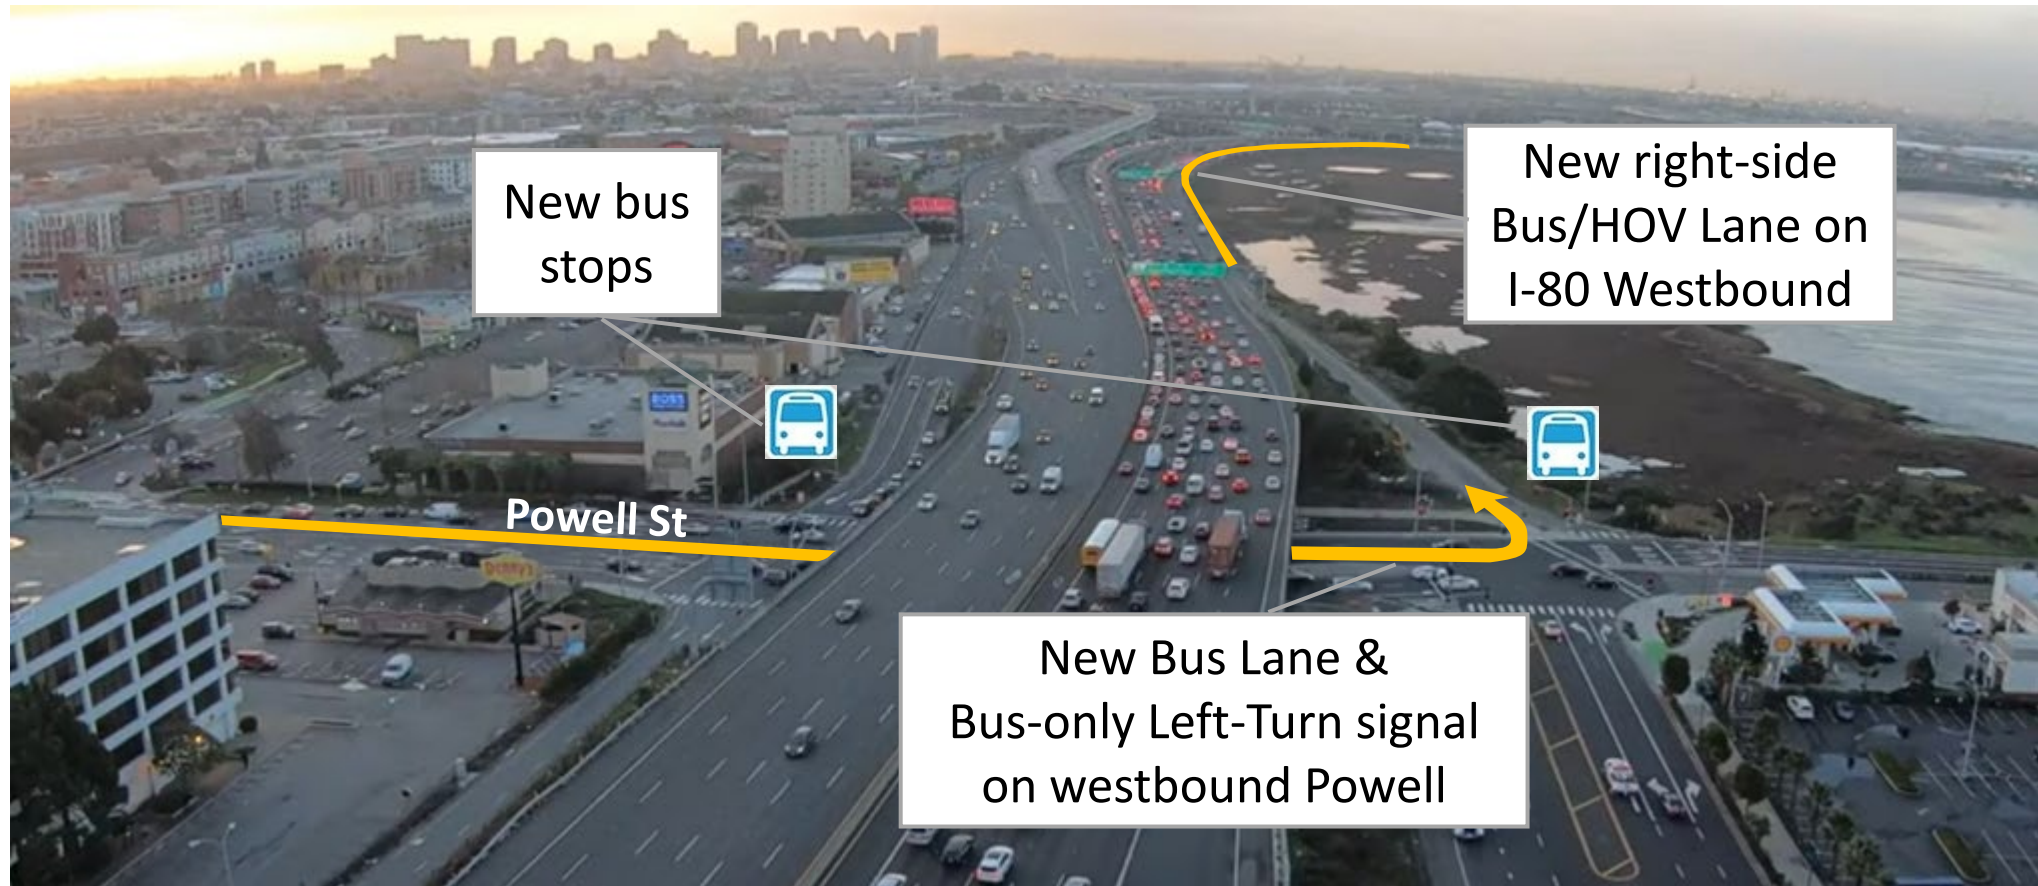

West Grand Bus/HOV Lane Extension

I-580 Westbound HOV Lane Extension

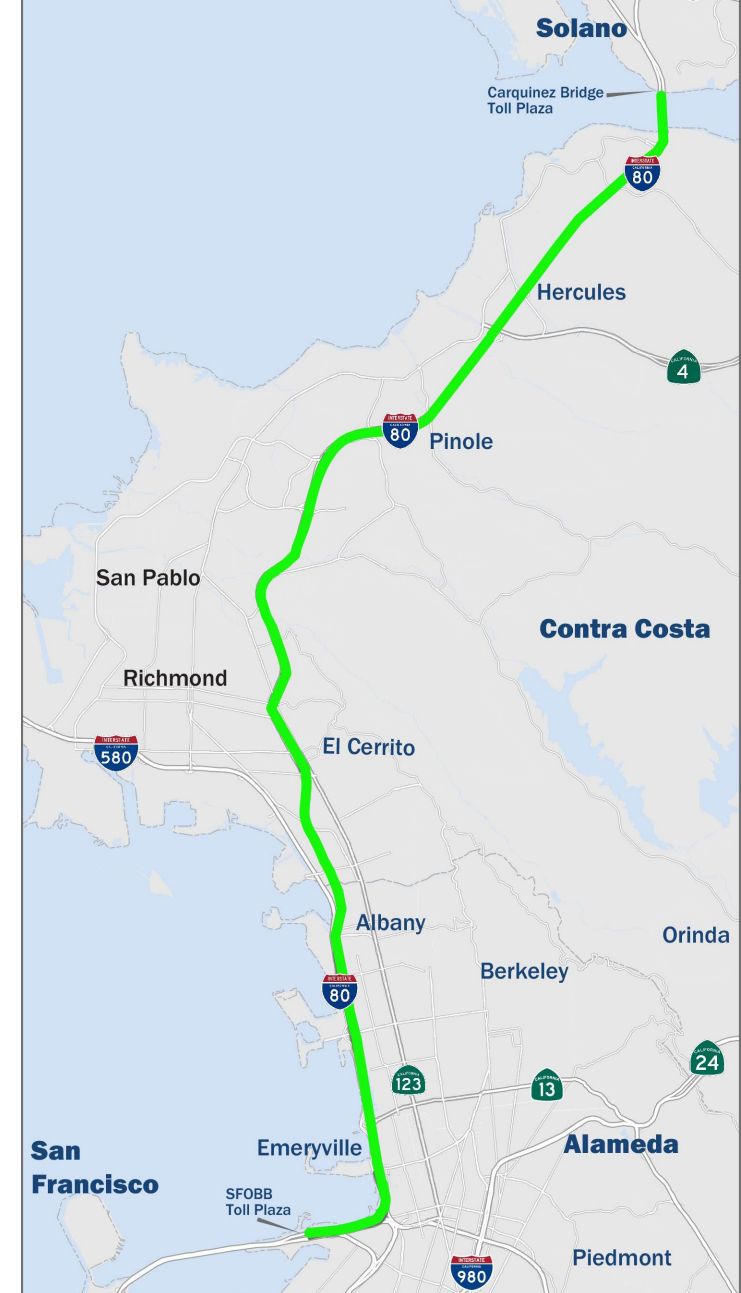

Powell Street & I-80 Westbound Bus/HOV Lane Project Improvements

Recommended Projects from I-80 Design Alternatives Assessment

- I-80 HOV Lane Hours of Operation
- I-80 HOV Lane Access Restrictions
- I-80 Localized Transit Priority/HOV Strategies
- I-80 Bus-on-Shoulder Feasibility Study

I-80 HOV Hours of Operations & HOV Lane Access Restrictions Projects

I-80 Localized Transit Priority/ HOV Strategies Project

Example Treatments:

- Ramp/Transit Access Improvements
- Transit Signal Priority
- Bus Stop Improvements
- HOV Bypass Lanes
