Attachment A Agenda Item 3a

Draft Expenditure Priorities Under Consideration

Category Description	on 	Examples of Eligible Investments (not exhaustive)	Equity & Climate Considerations
Transformation levels on be serve both a Accelerate Plan improve experience, and help furansit transit	d/or expand transit service rus, rail, and ferry lines to current and future riders. Transformation Action remember to the customer remember analysis of the long- metransit operating needs le be available this fall as ret of the Plan Bay Area ref process, enabling a remember understanding of to at extent this measure	 Preservation of existing routes and frequencies Increased frequencies and/or new routes to boost overall service levels Network restructuring that leads to net increase in transit service-hours Simplified and standardized fare programs & discounts Improved signage at stations and bus stops Transit priority infrastructure (signal priority, bus lanes for rapid/BRT, etc.) Safety enhancements, such as community ambassadors, 	Priority could be given toward preserving existing service levels and/or enhancing service frequencies on transit lines that benefit residents in Equity Priority Communities or that primarily serve underserved demographic groups. Priority could be given toward programmatic investments on transit lines or at transit stops/stations that benefit residents in Equity Priority Communities or that primarily serve underserved demographic groups.

		(<u>not exhaustive</u>)	Considerations
	and/or expand service frequencies. 2. This would include implementation of Transit Transformation Action Plan priorities, as well as complementary investments to grow ridership as identified in Transit 2050+.	improved lighting & security cameras - Paratransit service expansion to enable "one-seat rides" - Shuttles or other flexible mobility options accommodating all users - Bikeshare subsidies & system expansion	Investments related to transit operations and/or Transformation Action Plan implementation are anticipated to all be GHG-neutral or GHG-reducing.
Safe Streets	Transform local roads to better address safety and achieve equity, and climate goals, such as through improved expanded sidewalks and/or protected bicycle infrastructure, safety enhancements, traffic signal timing, and improvement pavement conditions.	Projects would ideally include two or more features to yield progress toward multiple goals concurrently, such as: - Street repaving projects - Buffered or protected bike lanes	Priority could be given toward road improvements or street redesigns located within an Equity Priority Community, contingent upon a robust community engagement process to engage local residents.

		(<u>not exhaustive</u>)	Considerations
	This would help fund multi-benefit projects – to help encourage walking and biking for nearby trips and to enable first/last mile connections to transit – while also working to ensure geographic balance throughout the nine-county region.	 Expanded sidewalks and/or bulb-outs Parallel multimodal trails Traffic calming features Traffic signal optimization Green infrastructure elements 	As investments in this category are not anticipated to include additional roadway capacity, this category is anticipated to be a mix of GHG-neutral and GHG-reducing projects.
Climate	Fund planning, design and/or	- Local or subcounty resilience	Priority could be given toward
Resilience	construction activities that benefit transportation infrastructure and nearby communities by protecting them from rising sea levels. While funding would likely not be sufficient to advance climate resilience megaprojects, funding could allow the region to build up a	plans to refine future pipeline of projects - Design and environmental analyses for future sea level rise resilience projects - Implementation of specific sea level rise resilience projects, such as:	resilience planning, design and/or construction activities in Equity Priority Communities or to protect transportation facilities primarily used by underserved demographic groups. Among other factors, investments would be prioritized based on timing of sea level rise impacts (e.g., 1 foot versus 4 feet);

	pipeline of future investments to	 Levees & horizontal 	investments would be contingent
	better compete for state or federal	levees	upon a robust community
	funding in the years ahead.	o Infrastructure elevation	engagement process to engage
		 Tidal gates 	local residents.
		 Wetland restoration 	
			Investments related to climate
			resilience are anticipated to all be
			GHG reducing or GHG neutral.
Connectivity	Fund mobility improvements that	- Rail extensions	Priority could be given toward
	close gaps and relieve bottlenecks in	- Rail grade separation &	projects that benefit residents in
	the existing transportation network in	modernization	Equity Priority Communities or
	a climate-neutral manner. Example	- Zero emission bus purchases	that primarily serve underserved
	projects include express lanes, rail	and related infrastructure	demographic groups.
grade separations, rail extensions and interchange modernizations.	grade separations, rail extensions and	- New ferry terminals	
	- Carpool-to-express lane	Investments are primarily	
		conversions	anticipated to be GHG-reducing
	This would help the region		(e.g., transit megaprojects),
	implement near-to-medium		although select non-capacity-
