

Plan Bay Area 2050+ Final Blueprint Growth Geographies

Attachment D

What are Growth Geographies?

Growth Geographies are geographic areas used in Plan Bay Area 2050+ strategies to guide where future growth in housing and jobs would be focused. Shown on the map on page 2 of this attachment, these geographies are identified either by local jurisdictions or because of their proximity to transit or access to opportunity. Although future development is not solely limited to Growth Geographies, these places are likely to accommodate the bulk of new homes and jobs in Plan Bay Area 2050+, similar to Plan Bay Area 2050. The four types of Growth Geographies are:

Priority Development Areas — Places nominated by local governments served by transit and planned for new homes and jobs at densities necessary to support effective transit service. All Priority Development Areas are supported by a resolution by the local government and approved by the ABAG Executive Board. (See ABAG Resolution 02-2019 for detailed criteria).

Priority Production Areas — Industrial areas of importance to the regional economy and local communities that support middle-wage jobs. Like Priority Development Areas, Priority Production Areas are backed by a local government resolution and approved by the ABAG Executive Board. Industries in Priority Production Areas typically require larger sites than those in Priority Development Areas with

different transportation needs. (See ABAG Resolution 02-2019 for detailed criteria)

Transit-Rich Areas — Places near rail, ferry or frequent bus service that were not already identified as Priority Development Areas. Across the region, this includes all areas outside Priority Development Areas subject to the Transit-Oriented Communities Policy. Furthermore, in jurisdictions where local governments have nominated Priority Development Areas on less than 50% of the land eligible for nomination, this also includes areas within 1/2 mile of a bus stop with peak service frequency of 15 minutes or less as defined during Plan Bay Area 2050.

High-Resource Areas — State-identified places with well-resourced schools and access to jobs, among other criteria. This designation only includes places that meet a baseline transit service threshold of bus service with peak headways of 30 minutes or better as defined during Plan Bay Area 2050. In addition, High-Resource Areas are only included if less than 50% land eligible for Priority Development Area designation land has been nominated by the local jurisdiction in question.

Areas Excluded from Growth Geographies — Places that would otherwise be growth geographies are excluded if within a “Very High” Fire Hazard Severity Zone mapped by the California Department of Forestry and Fire Protection (CAL FIRE), subject to sea level rise that is not mitigated by Plan Bay Area 2050+ Strategy EN1, outside locally-adopted urban growth boundaries, or in a protected open space, including parkland.

What’s changed since the Draft Blueprint?

The Plan Bay Area 2050+ Final Blueprint Growth Geographies are similar to the Plan Bay Area 2050 Draft Blueprint Growth Geographies, with minor refinements to reflect areas served by new or improved service in the Transit 2050+ Final Network that were not already identified as Growth Geographies. Mirroring the Draft Blueprint, the Final Blueprint Growth Geographies reflect the five new Priority Development Areas and boundary changes to 16 Priority Development Areas, as approved by ABAG in September 2023.
